Quick Start – Home Screen

Swipe down from the upper–right corner of the screen to access the Control Centre, which includes quick access to common features (Wi–Fi, Bluetooth, Refresh, WLAN Cast,More and three refresh modes).

1. Refresh

When image retention appears on the display, manual refresh can be used to clear it, or use a shortcut gesture by swiping down from the top of the left side of the screen for quick clearing.

Nature's Symphony: A Tranquil Garden in the City

In a serene corner of the city, a vibrant garden flourishes, captivating visitors with its stunning array of flowers. As the gentle breeze sweeps through, each bloom sways gracefully, creating a mesmerizing dance of colors. This oasis of tranquility offers a respite from the bustling urban environment, inviting people to immerse themselves in nature's splendor.

Roses, renowned for their timeless beauty, unfold in shades of crimson, pink, and white. Their velvety petals layer delicately, each one a testament to nature's artistry. Nearby, lilies stand tall and elegant, exuding a fragrance that enchants passersby, weaving an invisible melody that lingers in the air.

The garden's landscape is dotted with cheerful daisies, their simplicity offering a profound charm. Like scattered stars across a green canvas, these blooms bring a sense of joy and whimsy. Sunflowers, towering and majestic, turn their golden faces toward the sun, embodying hope and warmth, a symbol of summer's embrace.

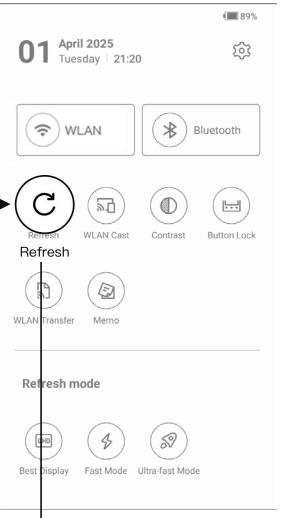

In the quieter corners, violets reveal their understated beauty, hiding in the shadows, waiting to be discovered by those who seek. Their subtle hues and delicate forms add a touch of mystery to the vibrant tapestry of life that surrounds them.

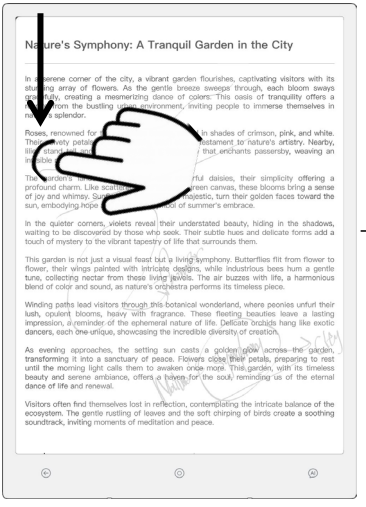

This garden is not just a visual feast but a living symphony. Butterflies flit from flower to flower, their wings painted with intricate designs, while industrious bees hum a gentle tune, collecting nectar from these living jewels. The air buzzes with life, a harmonious blend of color and sound, as nature's orchestra performs its timeless piece.

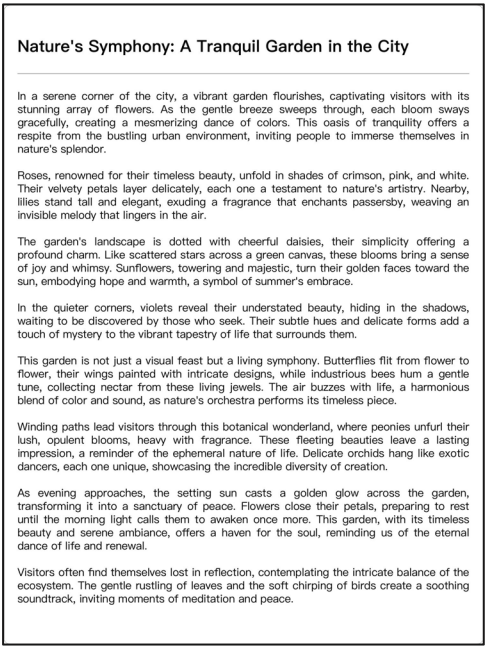

Winding paths lead visitors through this botanical wonderland, where peonies unfurl their lush, opulent blooms, heavy with fragrance. These fleeting beauties leave a lasting impression, a reminder of the ephemeral nature of life. Delicate orchids hang like exotic dancers, each one unique, showcasing the incredible diversity of creation.

As evening approaches, the setting sun casts a golden glow across the garden, transforming it into a sanctuary of peace. Flowers close their petals, preparing to rest until the morning light calls them to awaken once more. This garden, with its timeless beauty and serene ambiance, offers a haven for the soul, reminding us of the eternal dance of life and renewal.

Visitors often find themselves lost in reflection, contemplating the intricate balance of the ecosystem. The gentle rustling of leaves and the soft chirping of birds create a soothing soundtrack, inviting moments of meditation and peace.

2. WLAN Cast

Enable this feature in the [Control Center] by pulling down from the system bar.
To cast the screen within the same local network, either input the specified URL into the browser of the target device or scan the QR code for screen sharing.

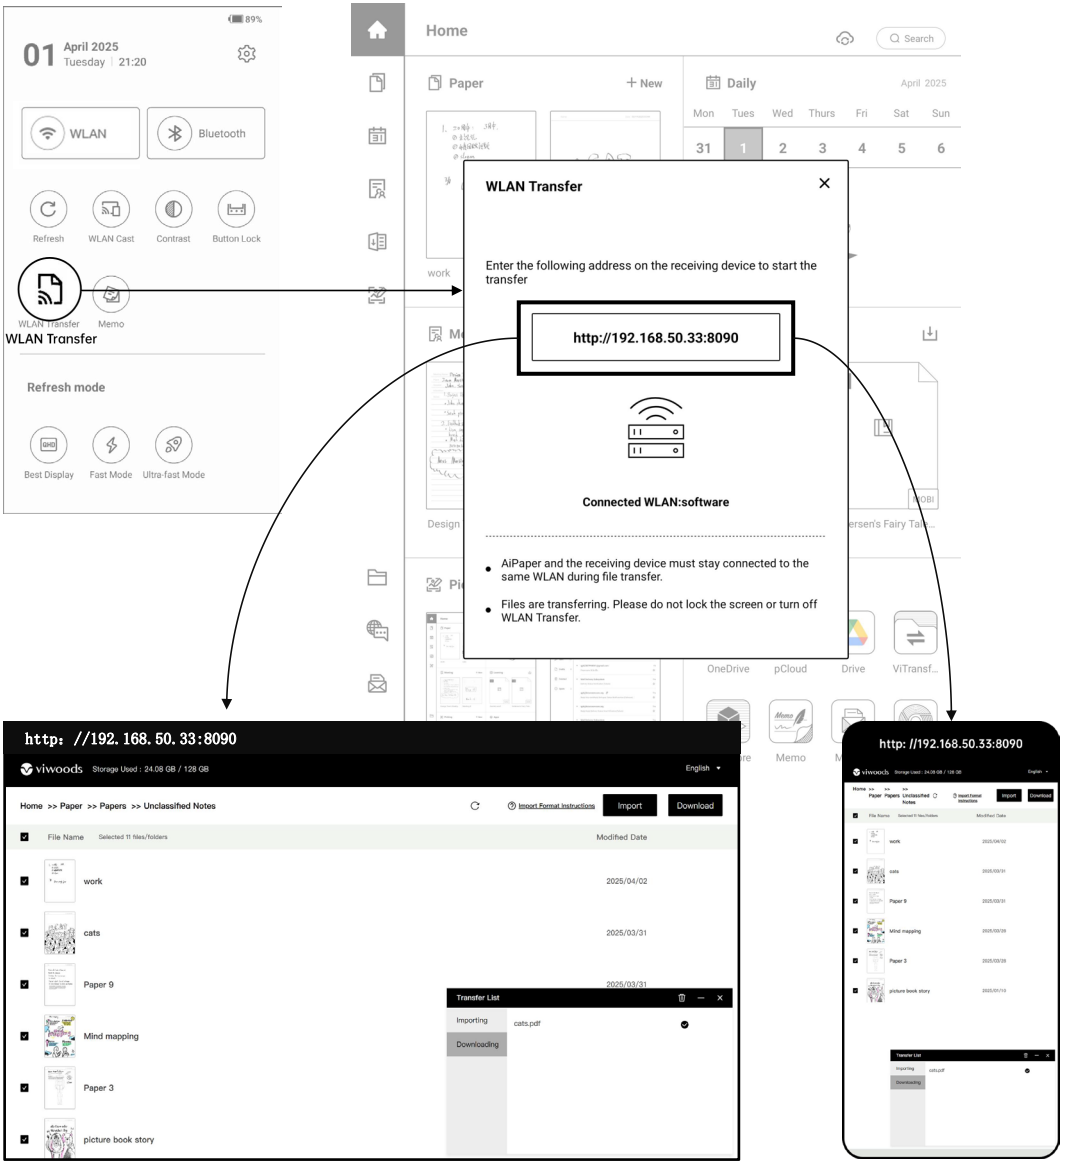

3. Contrast

The display effect of the current application can be customized.

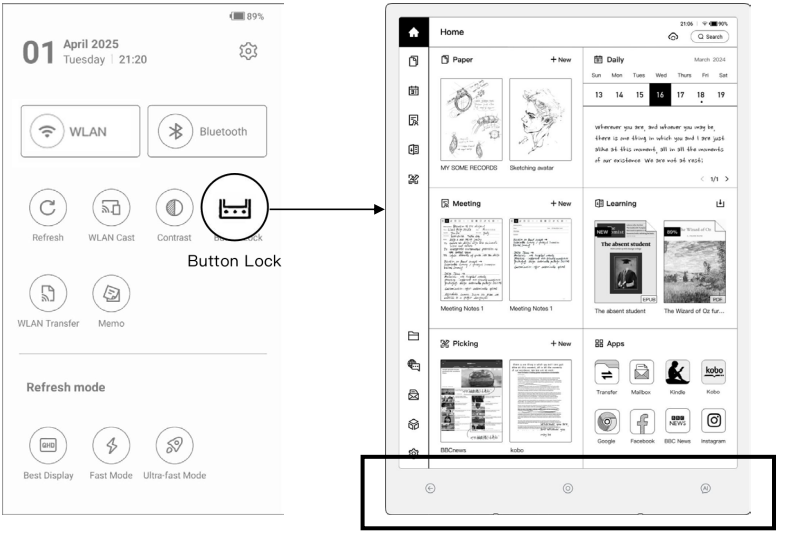

4.WLAN Transfer Shortcut Entry

Enable this option via the dropdown Control Centre in the system bar.
Within the same local area network, enter the designated URL in the browser of the target device to transfer files swiftly between devices.

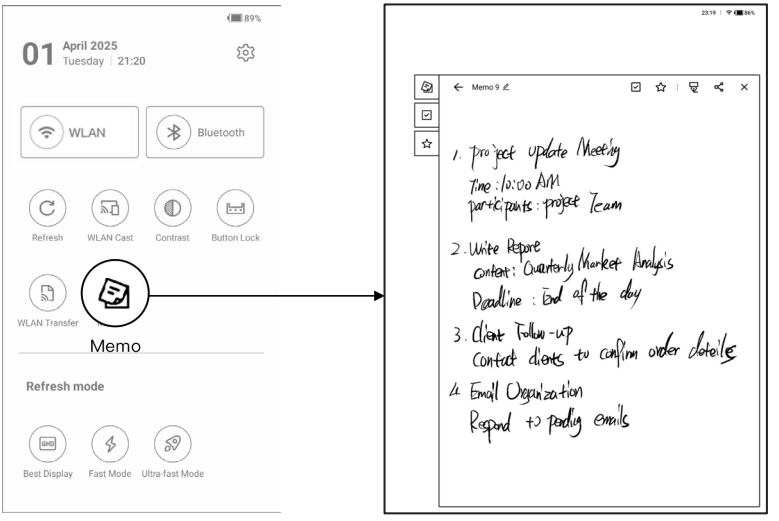

5.Disable Bottom Buttons

Enable to deactivate the bottom function buttons to prevent accidental touches.

6.Memo Shortcut

A shortcut to the Memo feature, allowing users to quickly jot down notes without interrupting the current workflow.

7. Refresh Mode

The Fascinating World of Parrots

Parrots are among the most captivating and colorful creatures in the animal kingdom. Known for their vibrant plumage and remarkable intelligence, these birds have intrigued humans for centuries.

Vibrant Colors and Varieties
Parrots come in a dazzling array of colors, from the brilliant green of the Amazon parrot to the striking blues and golds of the macaw. Each species boasts its unique patterns and hues, making them a favorite among bird enthusiasts.

Intelligence and Communication
Renowned for their cognitive abilities, parrots can mimic human speech and learn complex tasks. Some species, like the African Grey, are particularly adept at understanding and using words in context, demonstrating a remarkable level of intelligence.

Social Creatures
Parrots are highly social animals, often forming strong bonds with their human caretakers. In the wild, they live in flocks, engaging in complex social interactions. Their vocalizations serve as a means of communication, helping them to maintain these social structures.

Best Display (Default)

High-quality refresh mode with superior image quality but slower refresh speed. Suitable for displaying complex images or reading text.

Fast Mode

Fast refresh mode with lower quality but quicker refresh speed. Ideal for browsing web pages or fast scrolling.

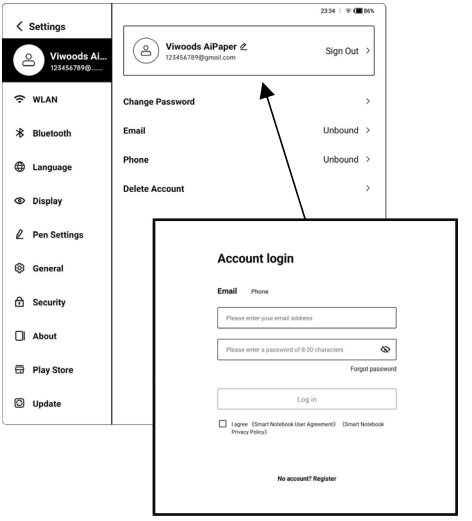

Ultra-fast Mode

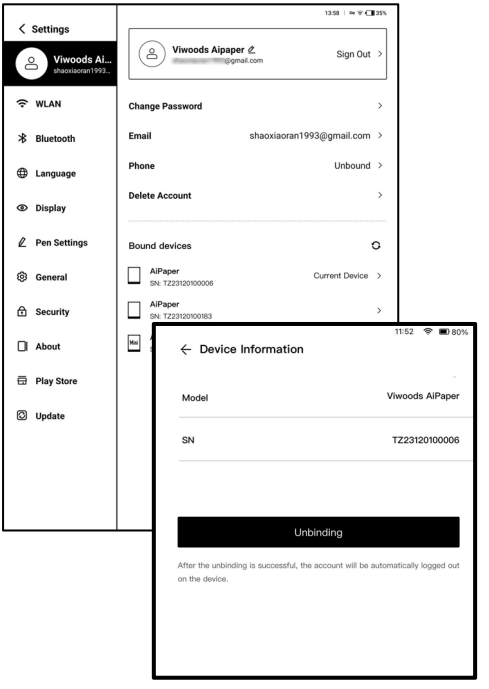

Offers even faster refresh speed, suitable for simple interface changes.

1.Viwoods Account

- Each device can be bound to a single Viwoods account.
- Email and phone number binding are supported. Account deregistration is available. Passwords must be at least 8 characters long and may include numbers, letters, and common symbols.

- Multi-device management: Upon logging in, users can view all devices linked to their account and perform remote unbinding.

2.Wi–Fi

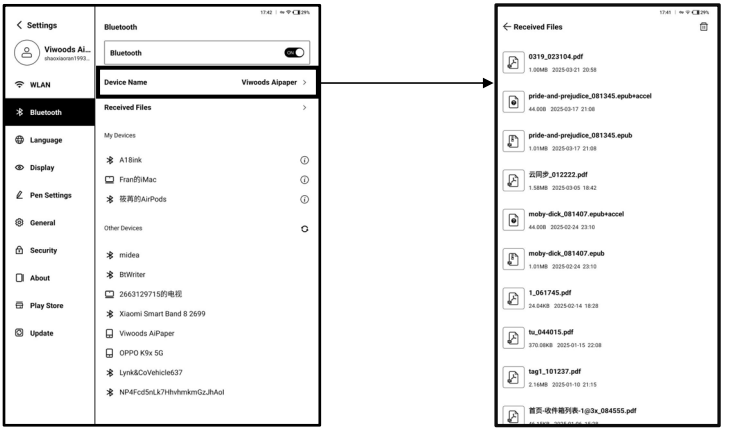

- Wi–Fi can be enabled to automatically search for available Wi–Fi hotspots. Select the desired Wi–Fi network and enter the password to connect. After a successful connection, Wi–Fi will automatically reconnect when enabled again.

- Wi–Fi can also be toggled in the Control Centre using the Wi–Fi button—short press to turn Wi–Fi on/off, long press to enter the Wi–Fi settings list.

- Supports enterprise Wi–Fi connection.

3. Bluetooth

- Enable Bluetooth to search for nearby available Bluetooth devices and send connection requests. Both devices must be paired for Bluetooth to function.
- Bluetooth can also be toggled in the Control Center using the Bluetooth button—short press to turn Bluetooth on/off, long press to enter the Bluetooth settings list.
- Supports file transfer via Bluetooth. Transferred files can be accessed under ”Received Files.”

4. Language

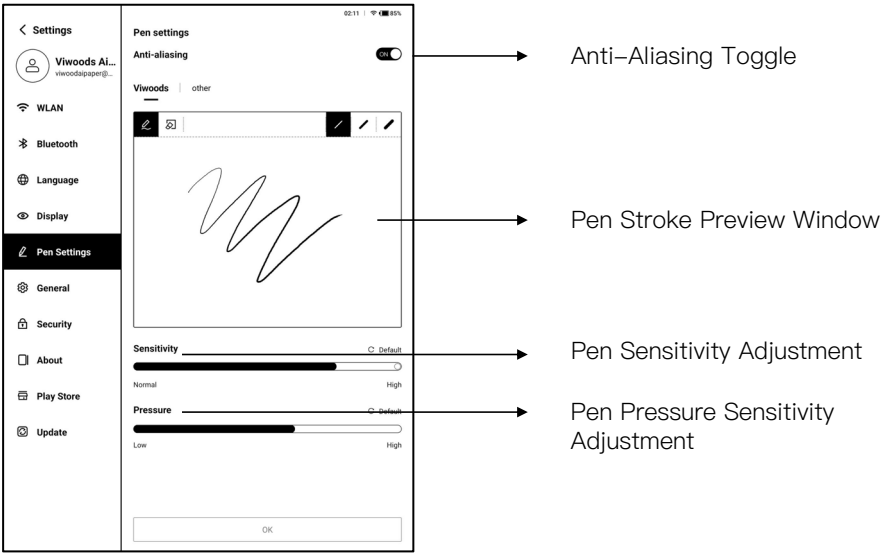

- Supports language selection, including English, German, Spanish, French, Italian, Dutch, Portuguese, Russian, Simplified Chinese, Traditional Chinese, Korean, and Japanese.
- Automatically adapts date formats according to the selected language.

5. Display Settings

- Supports font size adjustment.
- Supports manual configuration of sleep time.

6.Pen Function Settings

Allows adjustment of stylus sensitivity and pressure, and enables/disables the anti-aliasing function.

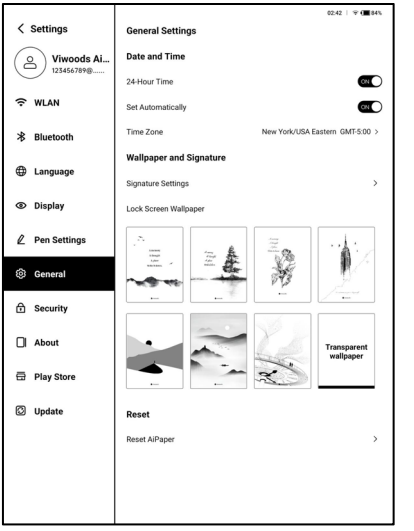

Anti-Aliasing Function Description:
• Are the written strokes jagged? Turn on anti-aliasing to instantly smooth them out!

Sensitivity Adjustment Instructions:
• Higher sensitivity allows writing with a light touch—ideal for those who prefer a delicate writing feel.
• Lower sensitivity requires more pressure for ink—helps prevent palm interference and improves ink output consistency.

Pressure Adjustment Instructions:
• High pressure sensitivity: light strokes produce fine lines; heavy pressure results in bold lines.
• Low pressure sensitivity: noticeable force is needed to see line width variation.

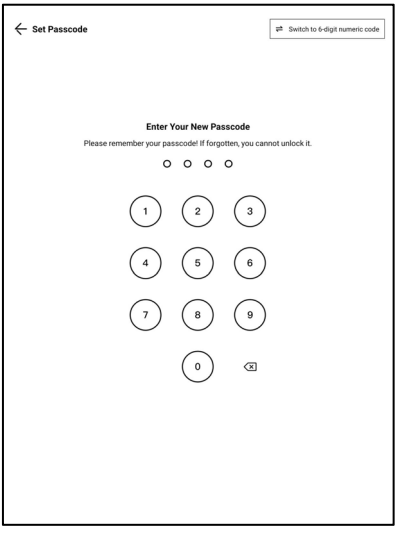

7. General

- Time format can be set to either 12-hour or 24-hour mode based on user preferences, and the date display format can be adjusted.
- Wallpapers and signatures can be customized. Transparent wallpapers are supported.
- Restore factory settings.

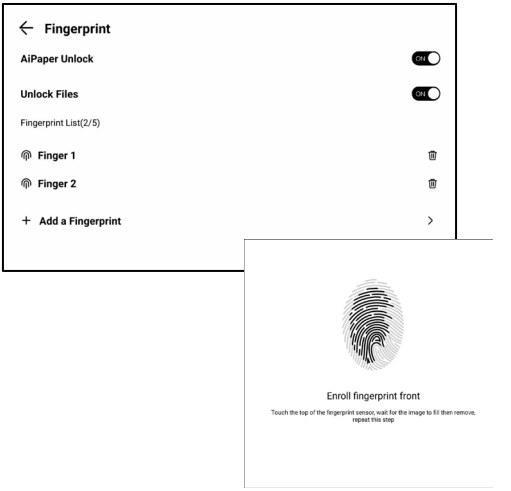

8. Security

- Lock Screen Password: Set a numeric password with 4 or 6 digits. Modification and reset options are available.

- Fingerprint: Fingerprint unlock is supported once a lock screen password is set. Up to 5 fingerprints can be stored and renamed. Fingerprint access is available for encrypted files.

9. About

Displays basic device information and memory status.

10. Play Store

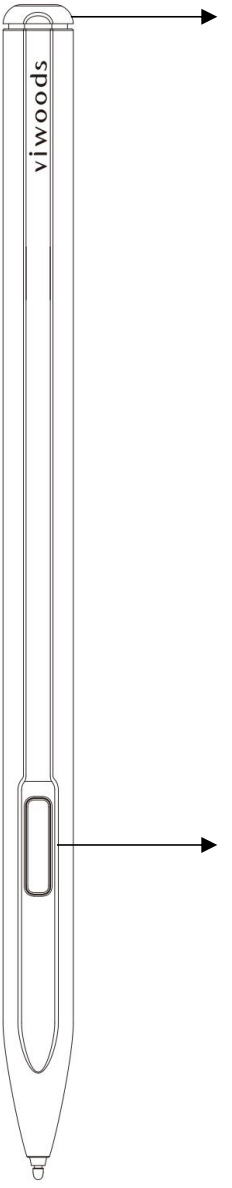

- Enable: Activates the Google Services Framework (Google authorization is required to properly access the Google Play Store and associated certified applications).
- Disable: Deactivates Google services and automatically clears cached data.

11. Updates

System check for updates and upgrades is supported, including the ability to view historical version update logs.

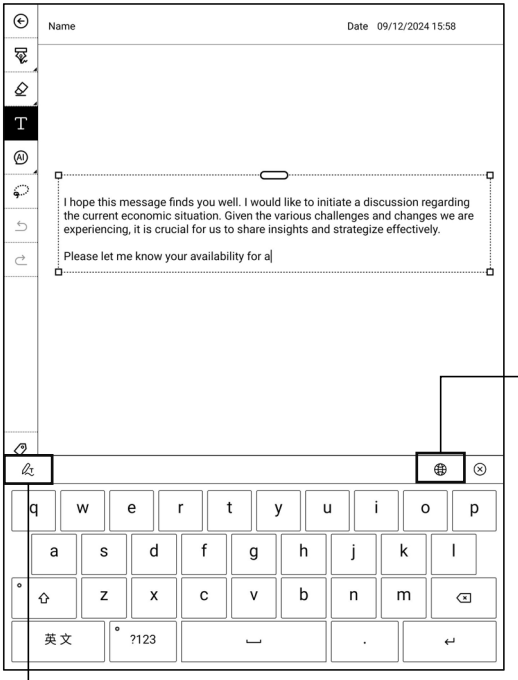

Eraser

The pressure-sensitive eraser adjusts its size based on the applied pressure. Lighter pressure results in a smaller eraser area, while increased pressure enlarges the erasing area.

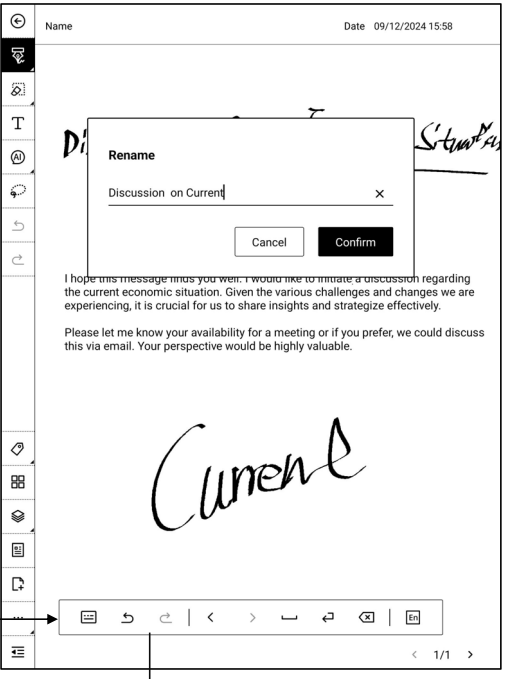

Physical eraser: Eraser size adjusts according to the pressure applied.

When the button is pressed, the eraser is activated, and the erasing area adjusts based on the pressure applied.

The sidebar tag panel displays all tags, where users may perform tag searches. Long pressing a tag enables editing functions such as delete or rename.

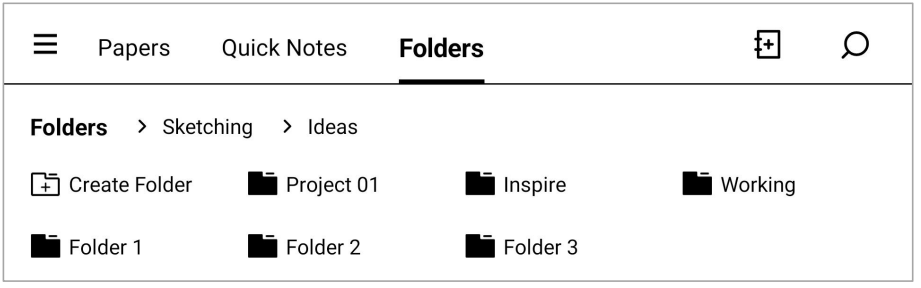

Example: Newly created quick notes will be automatically saved to the corresponding folder.

The templates above are linked to specific folders, and notes created using the same template will be automatically categorized and saved to the respective folder.

Folders support the creation and editing of subfolders.

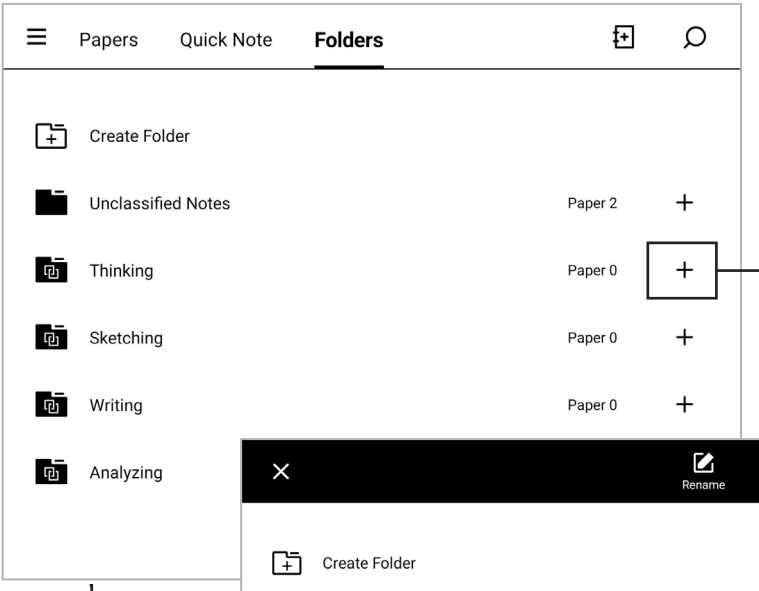

Represents a folder with no associated quick note properties, referred to as a “General folder.”

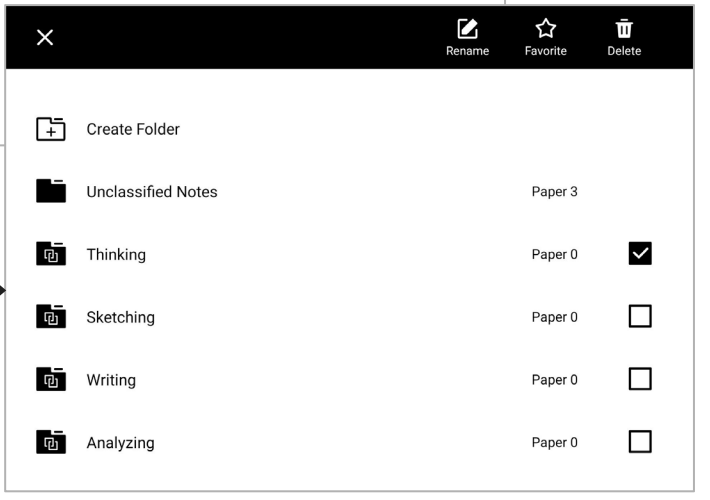

Represents a folder associated with quick note properties, referred to as a “Linked folder.”

Introduction to Linked Folders:

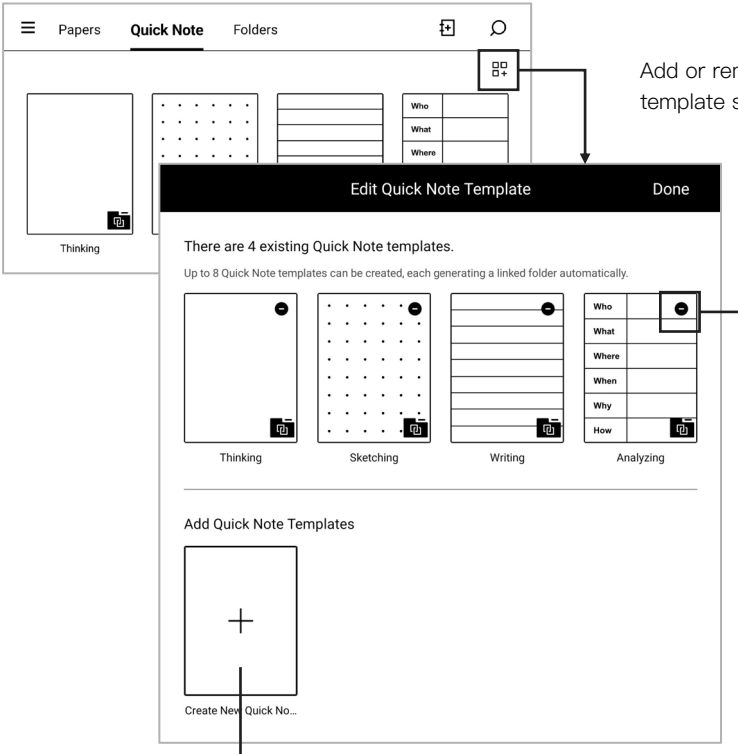

1. When a quick note shortcut is deleted, the linked folder will convert to a general folder.
2. Deleting the linked folder directly will also remove the associated quick note shortcut.
3. When a quick note shortcut is created, a linked folder with the same name will be generated.
4. To turn a general folder into a linked folder, create a quick note with the same name as the folder to establish the association.

Click to directly create a note that matches the folder’s properties, and the note will be saved within the folder.

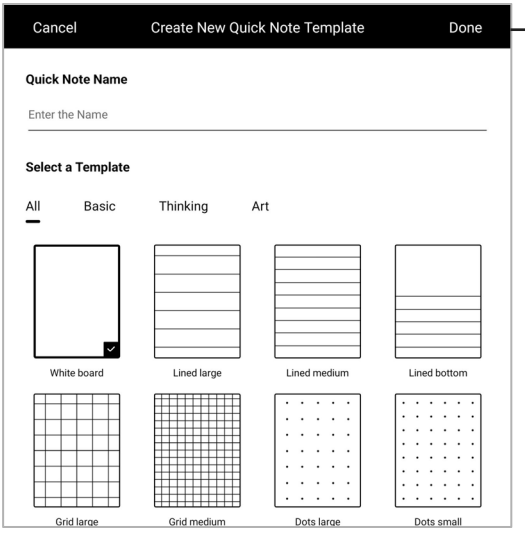

Long press to edit the folder

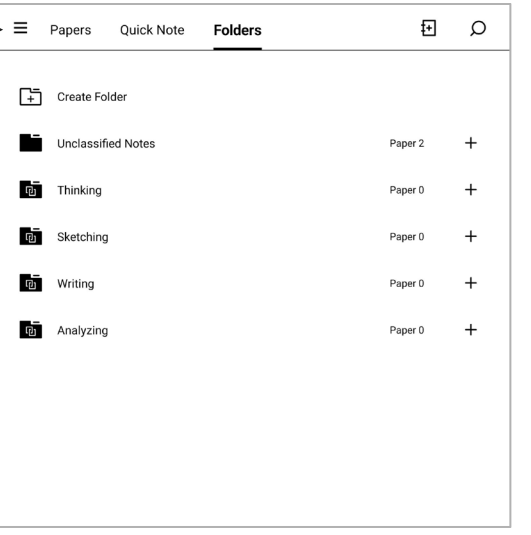

Add or remove quick note template shortcuts.

Click to delete the quick note template shortcut.

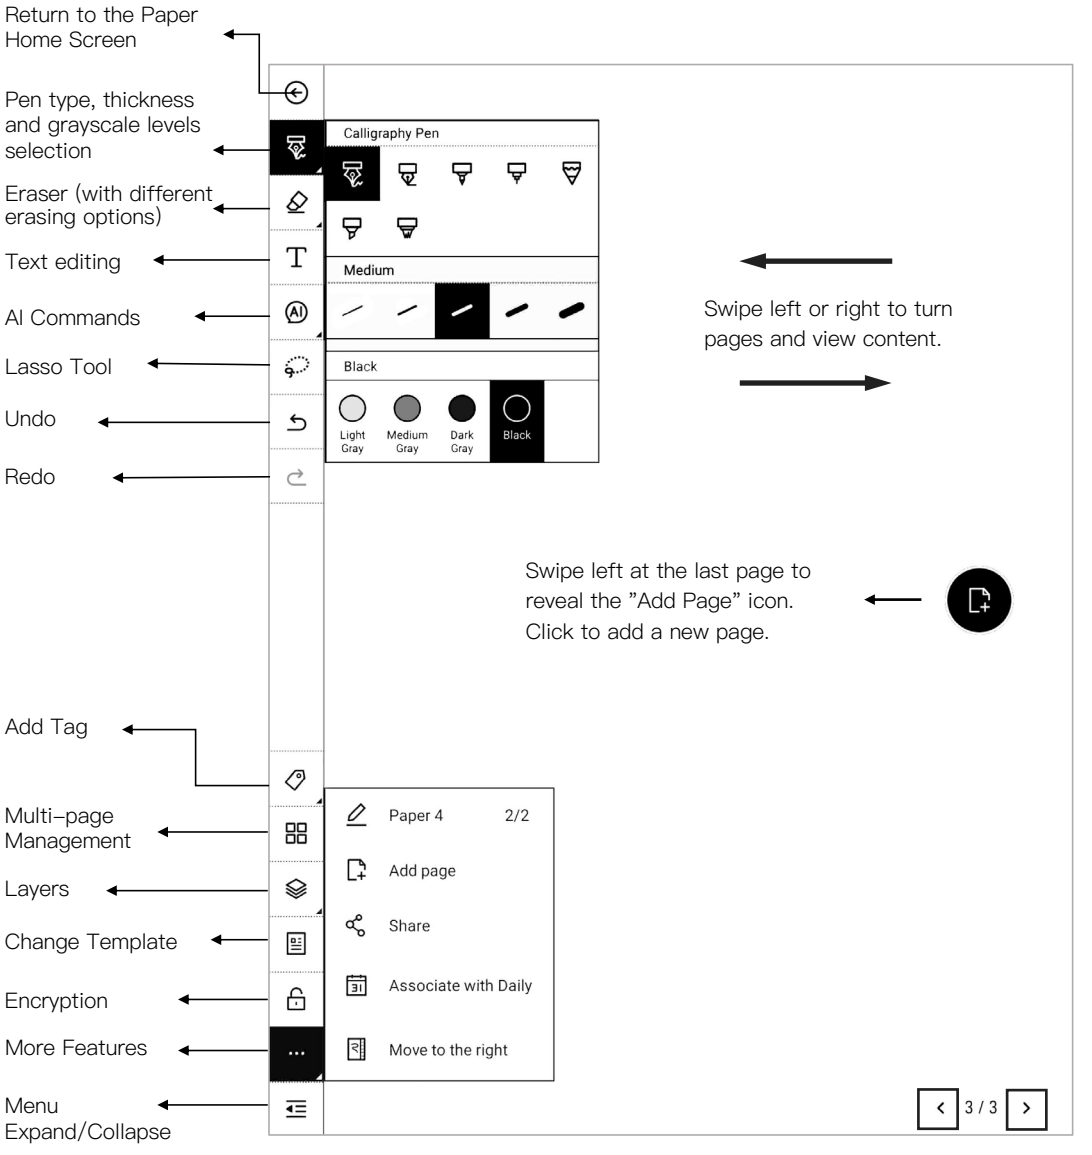

Click to add a new quick note template.

A linked folder with the same name will be generated after adding.

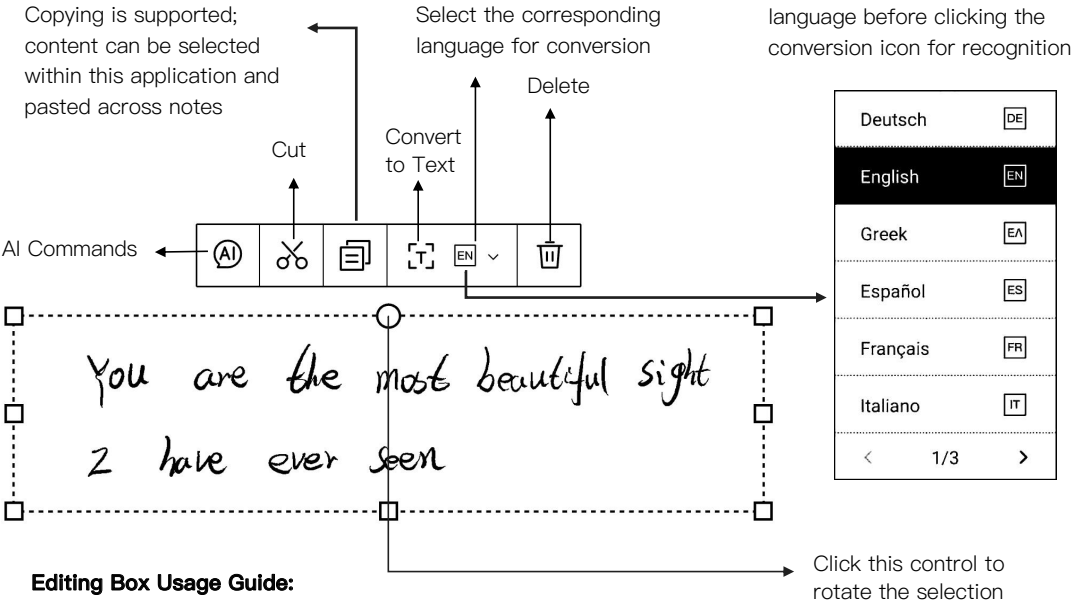

Paper Handwriting Page Functions

Swipe left or right to turn pages. At the last page, click to add a new page.

Lasso Tool Feature Overview

Note: To ensure accurate handwriting-to-text conversion, choose the appropriate language before clicking the conversion icon for recognition

Editing Box Usage Guide:

1. Select the lasso tool and use the pen to circle the desired area.
2. Drag the corner controls to scale proportionally.
3. Drag the side controls (left, right, bottom) to adjust the selection in one direction.
4. Hold the circular control to rotate the selected content.

Interactive Gestures are Supported for Undo and Redo Actions

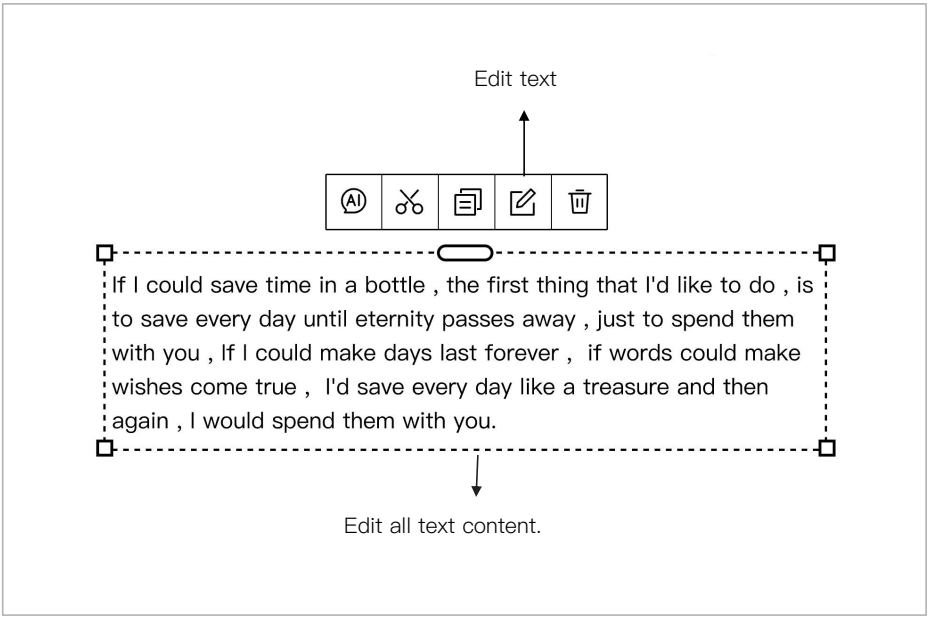

Undo and redo shortcut gestures are available within the Paper, Daily, Meeting, and Picking modules.

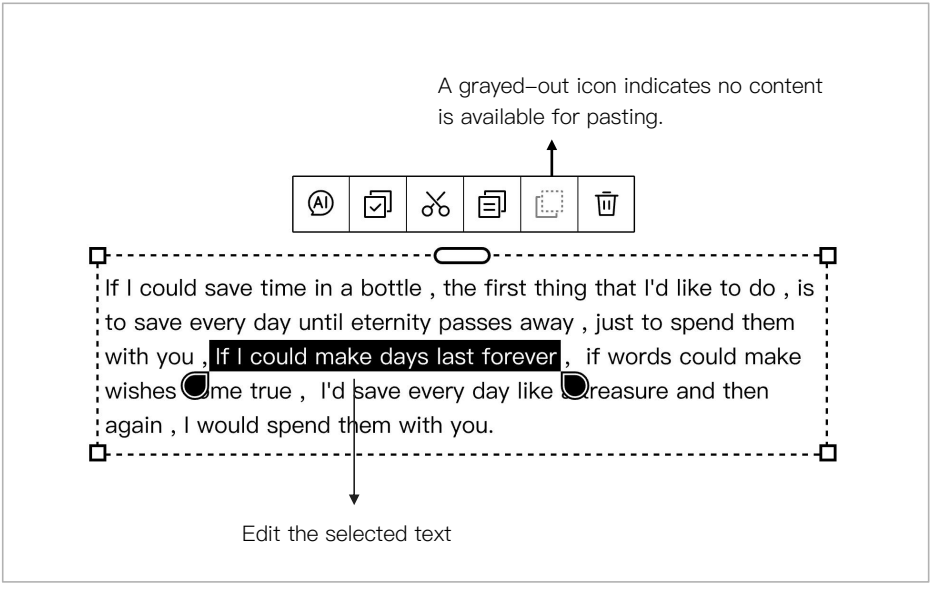

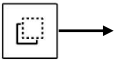

Two-finger tap performs the "back" function

Three-finger tap performs the "redo" function

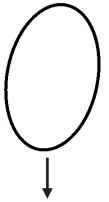

After copying, press and hold to display the paste icon, then tap to paste. Cross-module copy and paste functionality is supported.

Geometric Shape Recognition Overview

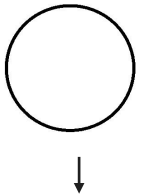

Shape Recognition Process

1. Draw the desired basic shape in one stroke.

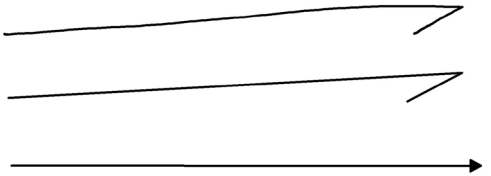

2. Pause for 1 second at the endpoint to recognize it as a geometric shape.

3. While pausing, press and hold with the other hand to convert it into a standard shape.

Special Arrow Recognition Process

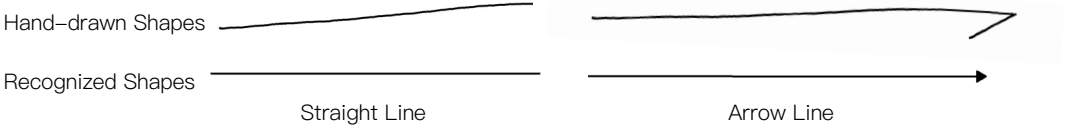

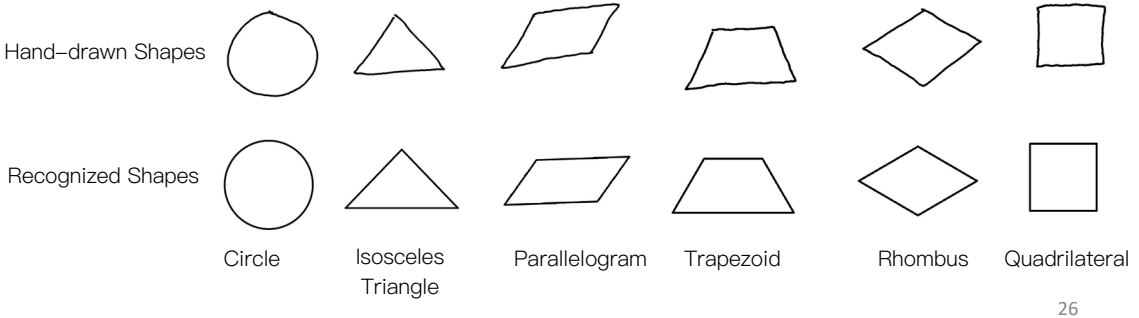

1. Draw a shape with a hook in one stroke.

2. Pause for 1 second at the endpoint to recognize the shape.

3. While holding the pen at the endpoint, press and hold with the other hand to transform it into a line with an arrow.

Supported Standard Shapes for Recognition

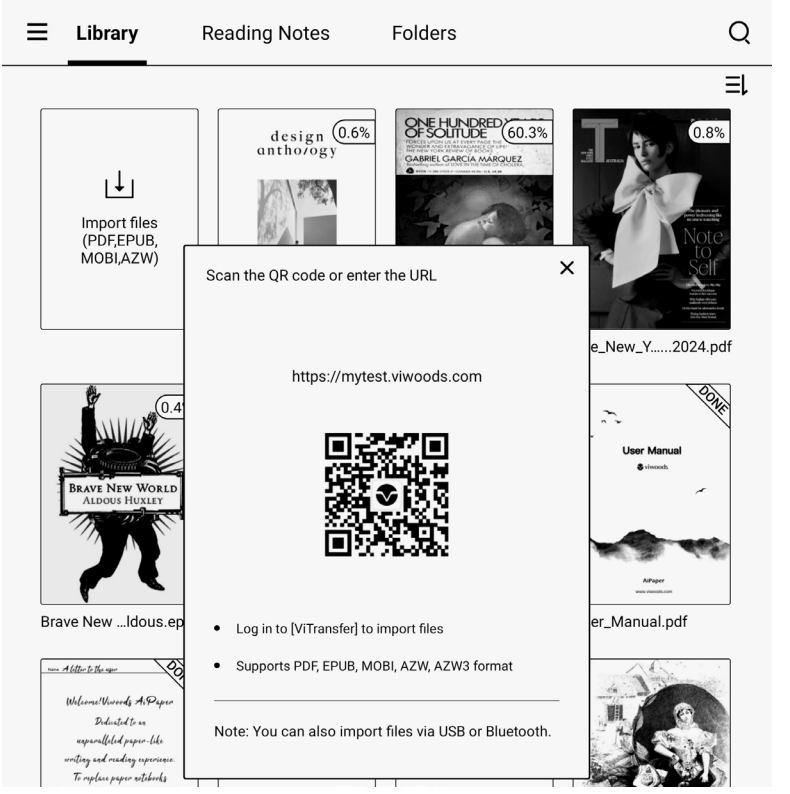

The Learning module currently supports reading and annotating files in PDF, EPUB, MOBI, AZW, and AZW3 formats. Files may be transferred to this device via Viwoods Transfer and accessed through “My Library.”
While browsing files, use a highlighter to annotate, mark key points, challenges, and areas of confusion, and make notes. AI support enhances learning and work processes. Annotated pages can be used to create new reading notes, facilitating focused review and further development.

Importing Files

Click ”Import Files” and use your mobile device or tablet to scan the QR code in the pop-up, or enter the address https://my.viwoods.com on a computer. Transfer PDF、EPUB、MOBI、AZW files from your web or mobile device to this device and access them in ”Library.” For detailed import instructions, refer to ”File Transfer—Import.”

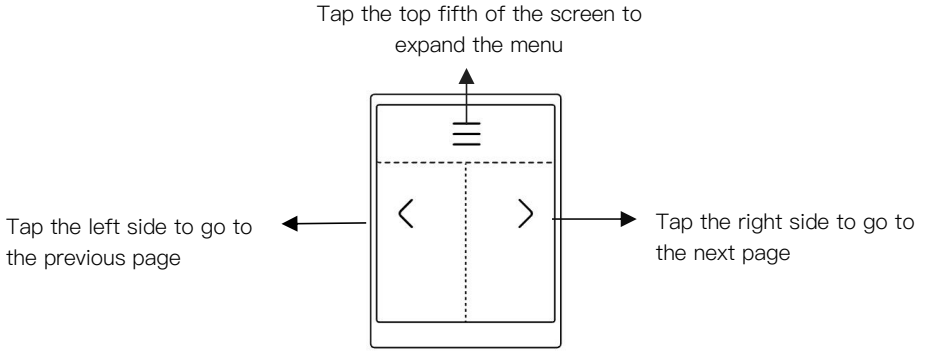

Folder

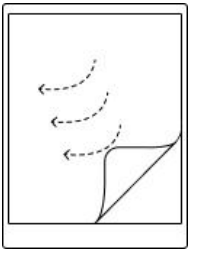

Folder and subfolder management is supported. Users may organize reading materials into folders for easier categorization and management.

Page Turn Gestures

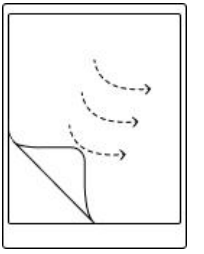

Single-finger Tap

Single-finger Swipe

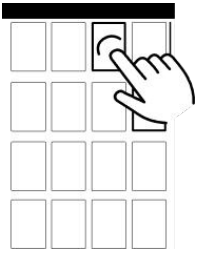

Swipe from right to left to go to the next page

Swipe from left to right to go to the previous page

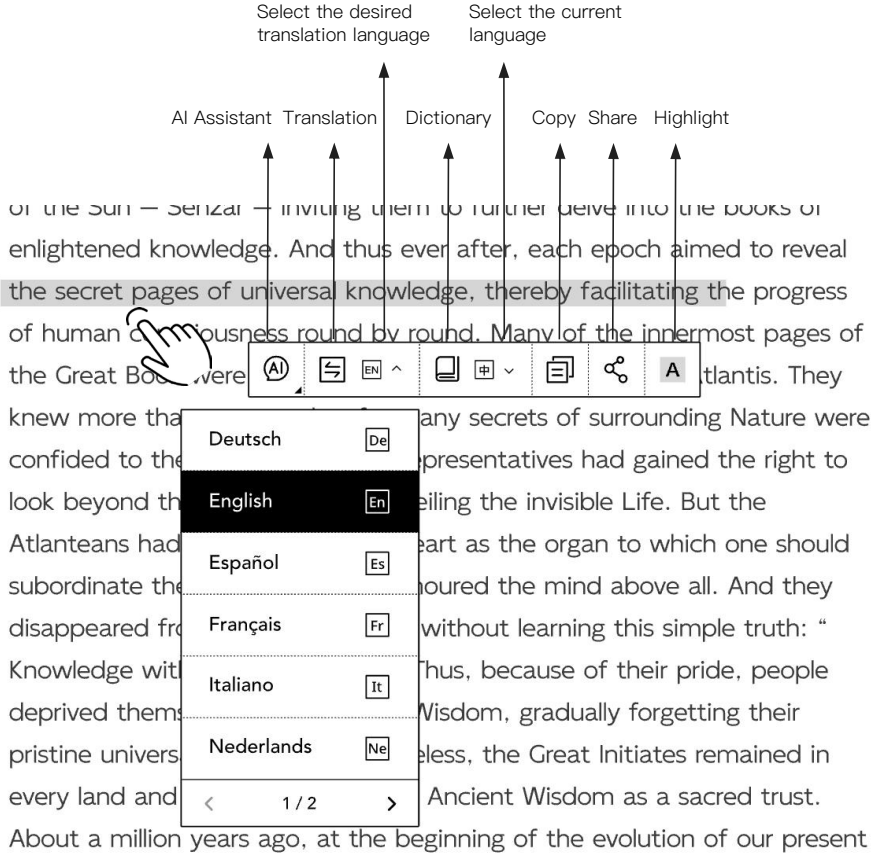

Long Press

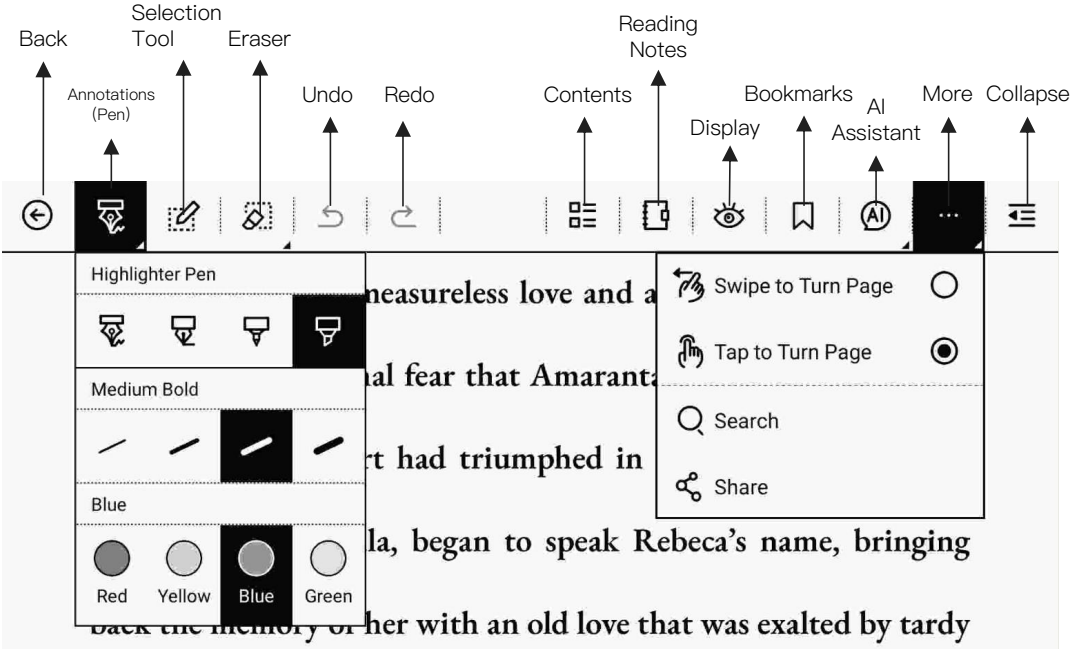

In "My Library," a single-finger long press on a book allows renaming or deletion of the book.

On the reading interface, long press with one finger or use the selection tool to highlight text in PDF or EPUB files. Selected text can be used with AI Assistant, Translation, Dictionary, Copy, Share, and Highlight features.

- **AI Assistant:** Automatically pastes the selected text into the AI Assistant for answering queries.
- **Translation:** Translates selected characters, words, sentences, or paragraphs into the chosen target language.
- **Dictionary:** Provides definitions for individual characters.
- **Copy:** Copy selected valuable text to paste into notes, meeting records, or any other required area.
- **Share:** Export selected text as a TXT file and share it to desired terminals via QR code, email, file transfer, or Bluetooth.
- **Highlight:** Highlights selected content, which is automatically saved in the Highlight section of Reading Notes for consolidated viewing and management. Highlights can also be exported in PDF format, with the exported text available for copying and editing.

Annotations

Freely write or highlight important, doubtful, or challenging points on opened book documents. Various pens can be selected during annotation, including fountain pens, art pens, technical pens, and highlighters for richer content. PDF files support full–document sharing with annotations included.

Annotation Stroke Undo

Undo by stroke during annotation.

Eraser

Includes pixel eraser, lasso eraser, and erase all options. Lasso eraser is the default.

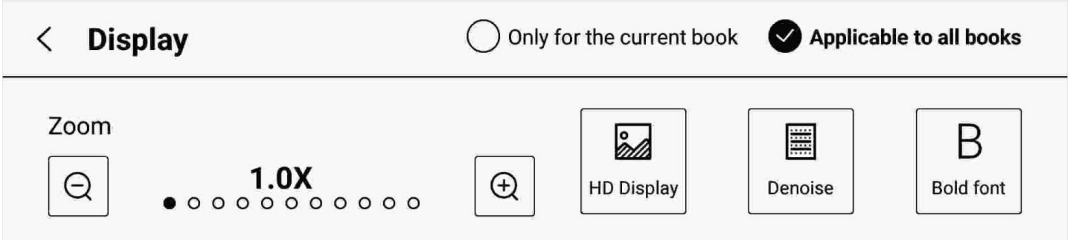

Contents

Displays the chapters and page numbers of the book, allowing quick browsing of the book's structure and locating specific chapters. PDF files without a table of contents can automatically generate and display page numbers.

Reading Notes

All annotated pages within a book can be collectively viewed. Users may select one, multiple, or all pages to compile into a single PDF file, and share their reading notes via email, QR code, Viwoods Transfer, or Bluetooth.

Display (PDF)

Original Image

Displays without any additional effects.

Denoise

Enhances the image quality for a more refined display.

HD Display

Strengthens HD display for clearer image quality.

Zoom

Click to Zoom

Tap the zoom buttons to enlarge the PDF file proportionally by 1.1X, 1.2X, 1.3X, 1.4X, 1.5X, 1.6X, 1.7X, 1.8X, 1.9X, and 2.0X. After zooming, use a two-finger swipe to view details outside the visible area. When writing on a zoomed PDF document, the stroke size adjusts proportionally and remains in the same position.

Two-Finger Gestures

Pinch inward to reduce the page size

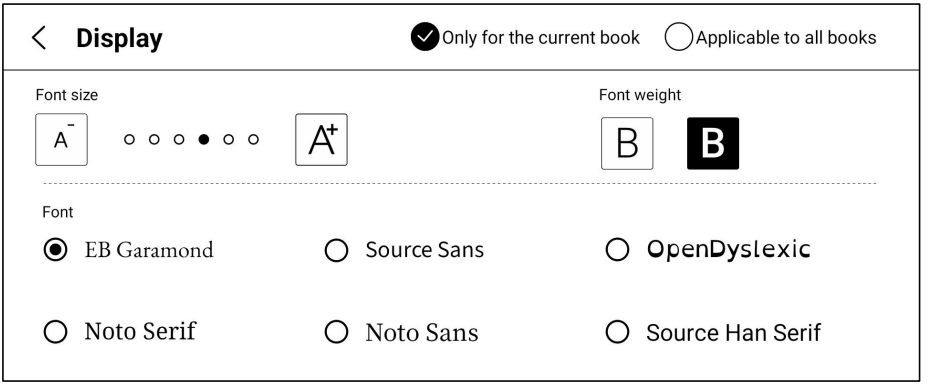

Pinch outward to enlarge the page

After enlarging the page, swipe with two fingers to move the page

Font Settings (Epub)

Set Font Size

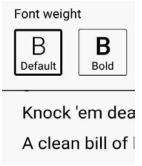

Use the font size adjustment buttons to set the font size according to reading preferences.

Set Font Style

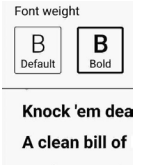

Select from various font styles based on preference. Available fonts include EB Garamond、Source Sans 、OpenDyslexic、Noto Serif、Noto Sans、Source Han Serif.

Bold Font

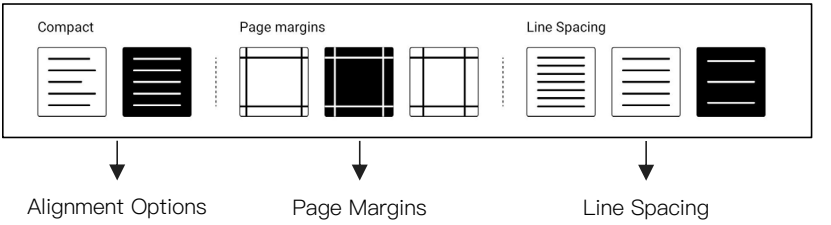

The default font style

The bold font style appears thicker

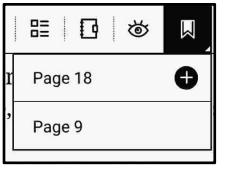

Page Settings

Bookmarks

When reading a lengthy book, use bookmarks to quickly revisit related pages. Bookmarks help locate associated pages efficiently.

AI

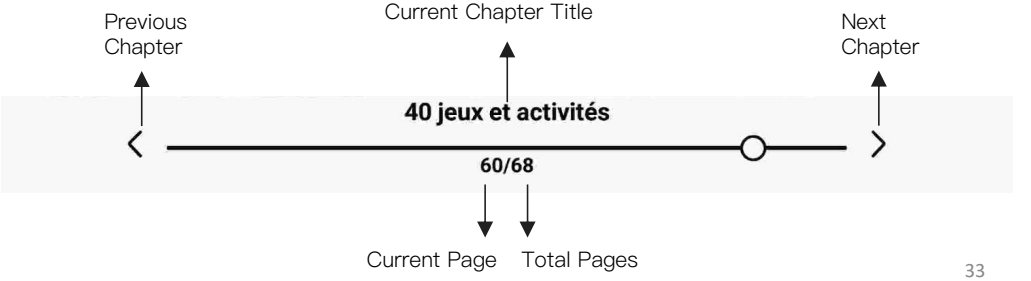

Use AI assistance to resolve questions, find information, or expand thinking during reading.

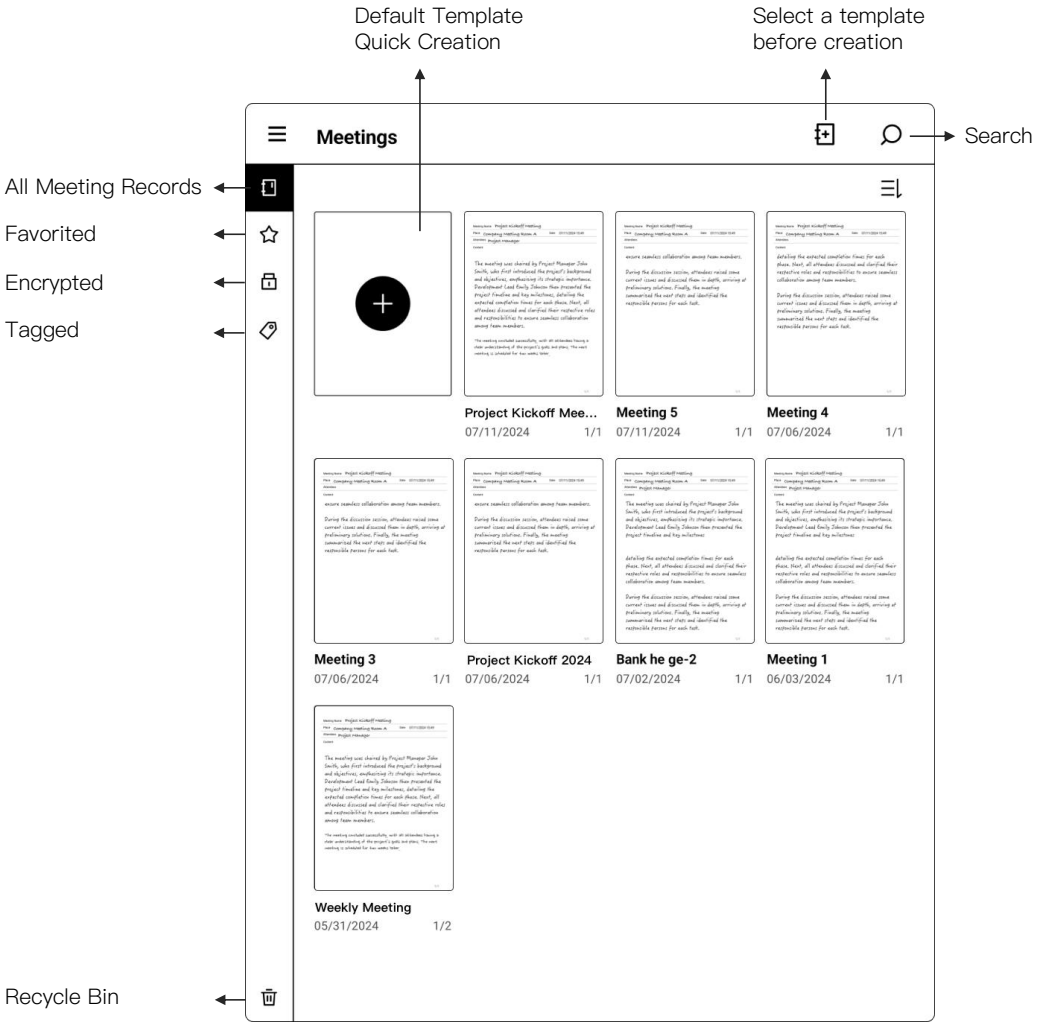

Share

Share the current page being read.

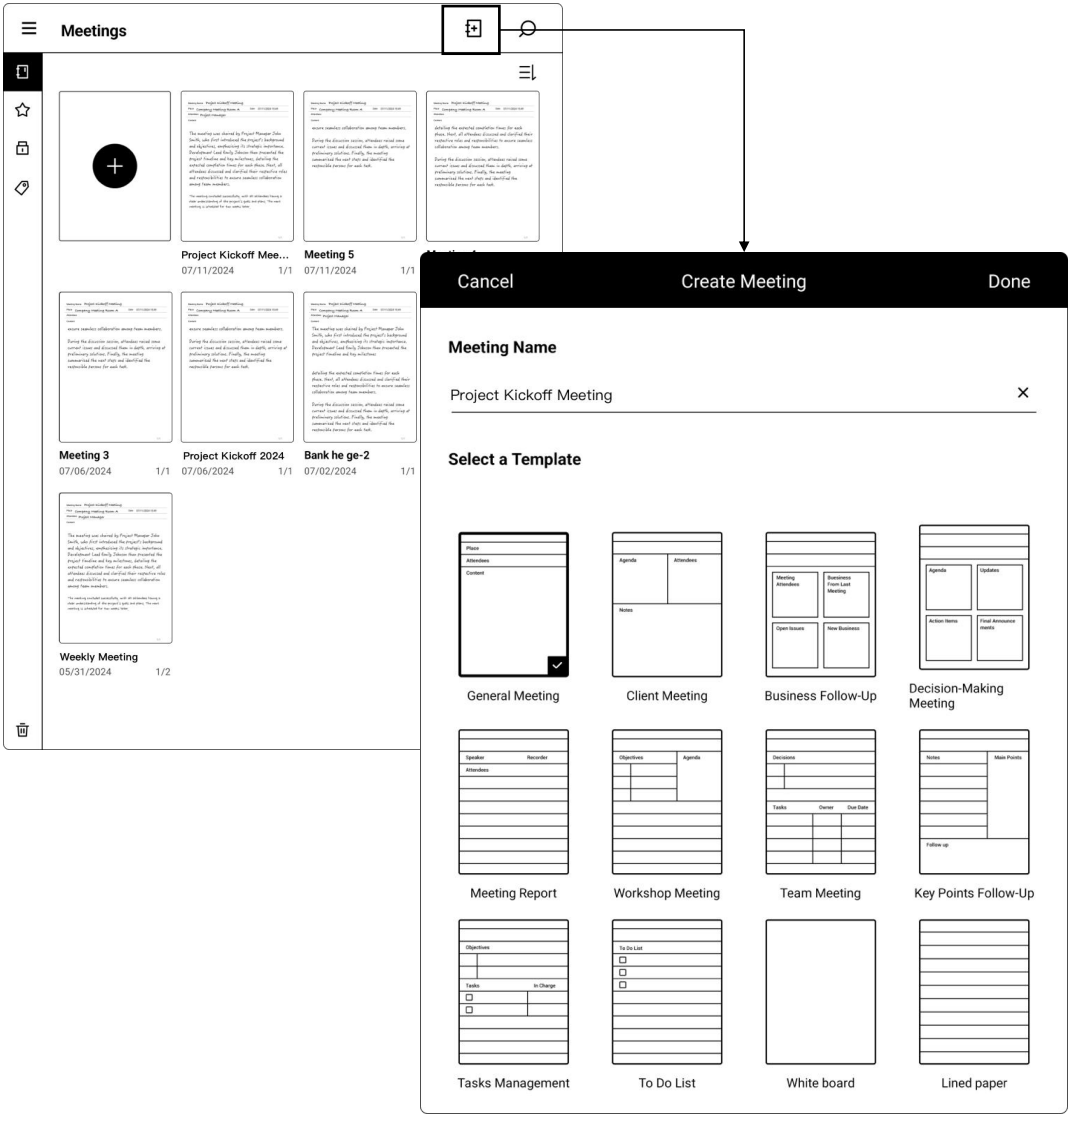

Progress Bar

While browsing, tapping the bottom fifth of the screen reveals a progress bar. You may slide the bar for quick navigation, or tap the arrow to jump directly to specific chapters.

Display, Create, and Edit Events

Daily overview with real-time timeline displays time ranges of scheduled events. Events can be created, edited, and deleted

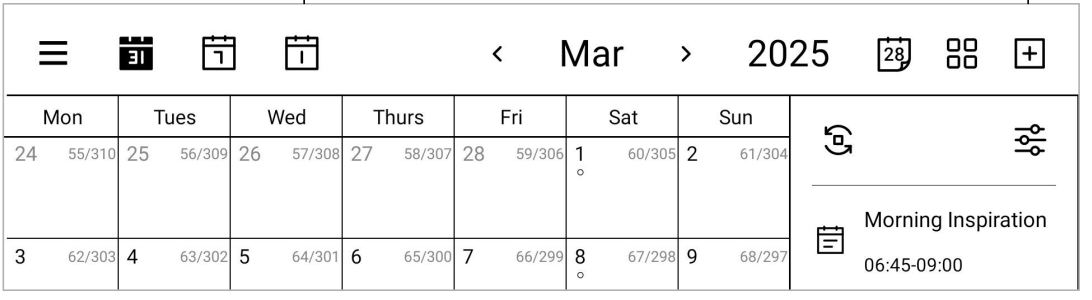

Timeline
Real-time time feedback is supported

Tap on any displayed event to edit or delete it

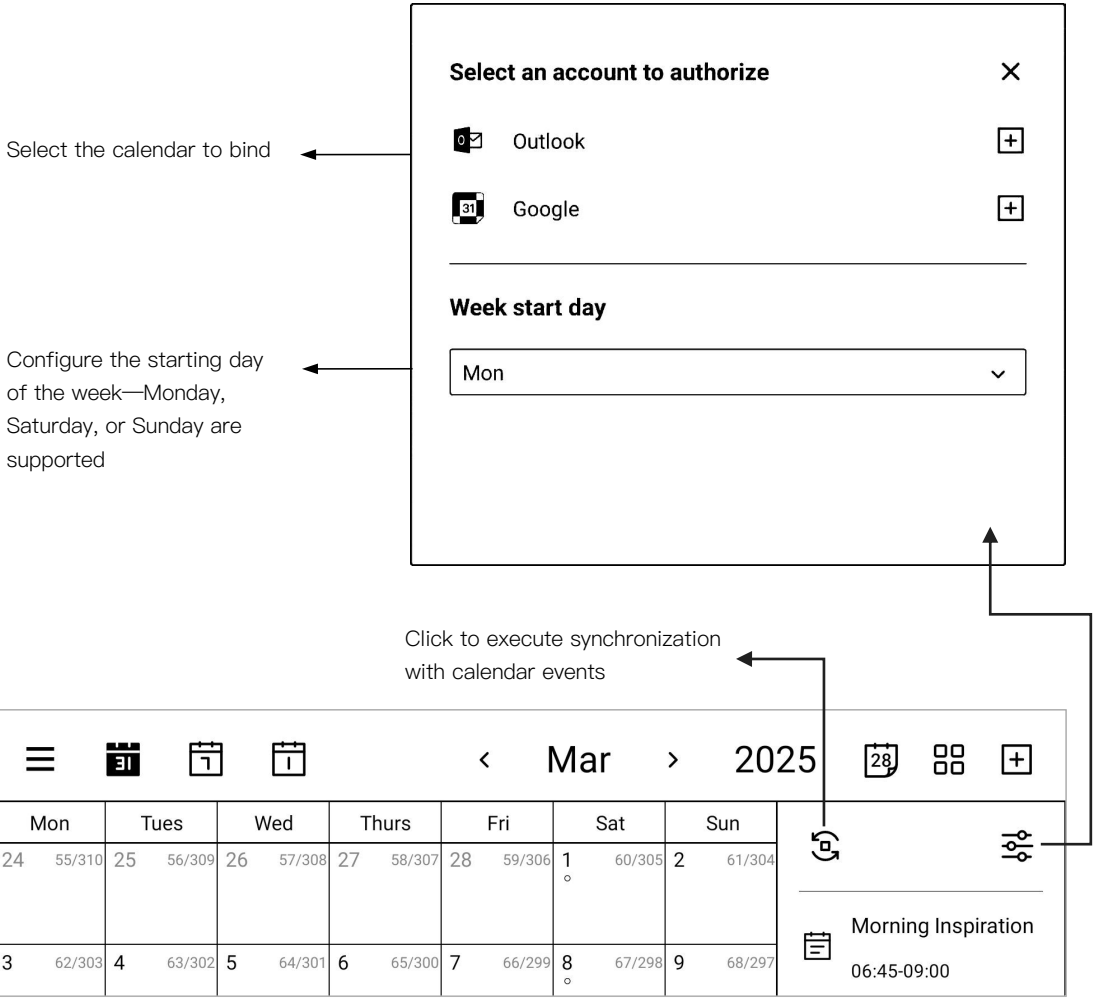

Create Event

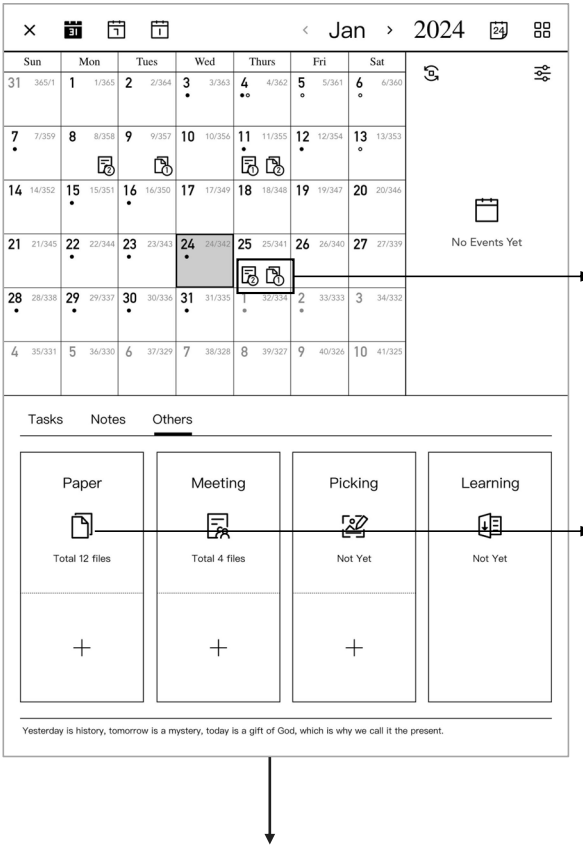

Calendar Binding and Synchronization

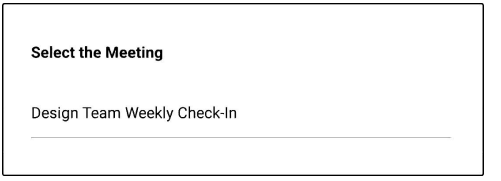

Supports integration with Outlook and Google Calendars. Once linked, events added, deleted, or modified will automatically synchronize. After unbinding, only locally created events remain on the device.
Note:
1. Outlook enterprise accounts require manual administrator authorization to synchronize with the device calendar.
2. To ensure user privacy, calendar binding and synchronization are conducted entirely through third-party protocols, without passing through our servers. Binding may occasionally fail; please retry if so.

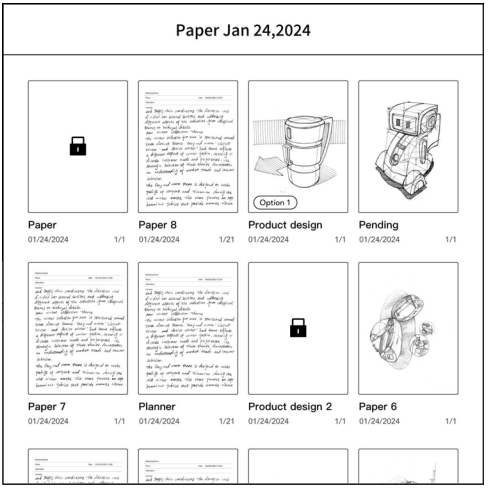

Paper and Meeting Integration

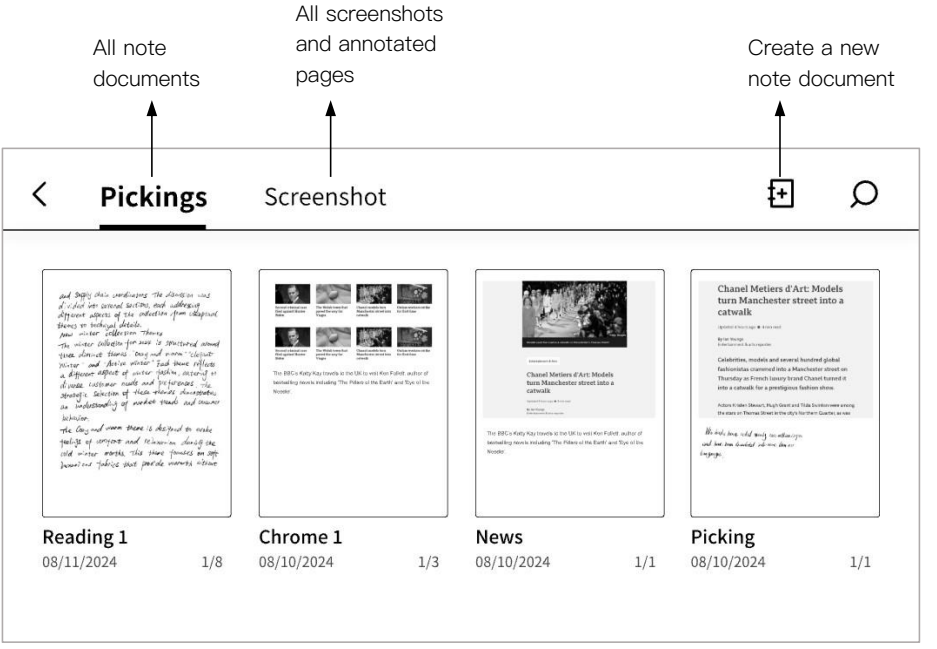

Notes from the Paper and Meeting modules can be linked to specific dates in the Daily module. Clicking the note name reopens it at the page where the link was created.

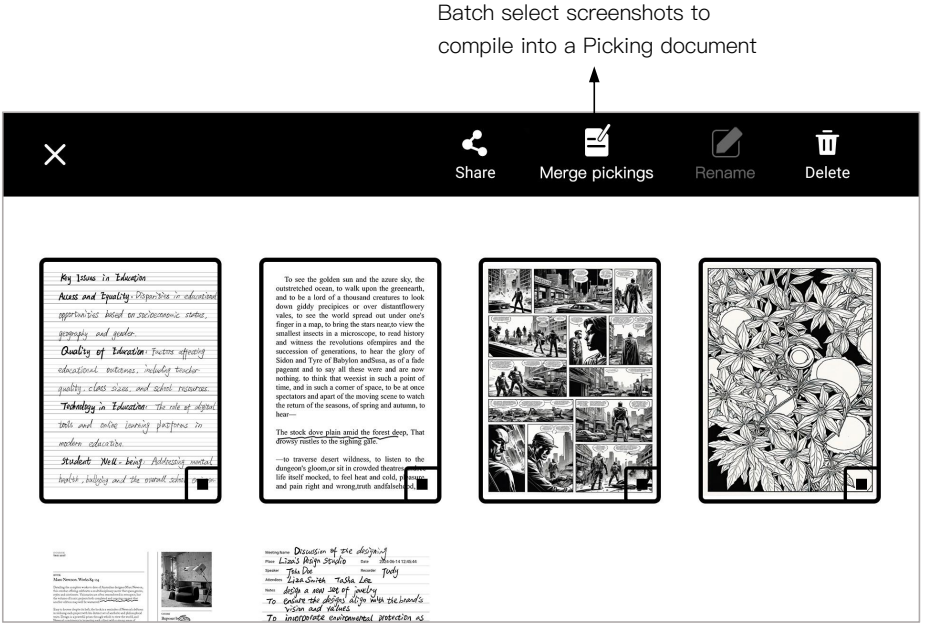

“Others” Tab: A daily summary window across all applications. Here you can view documents created in the Paper, Meeting, Picking, and Learning modules by date.

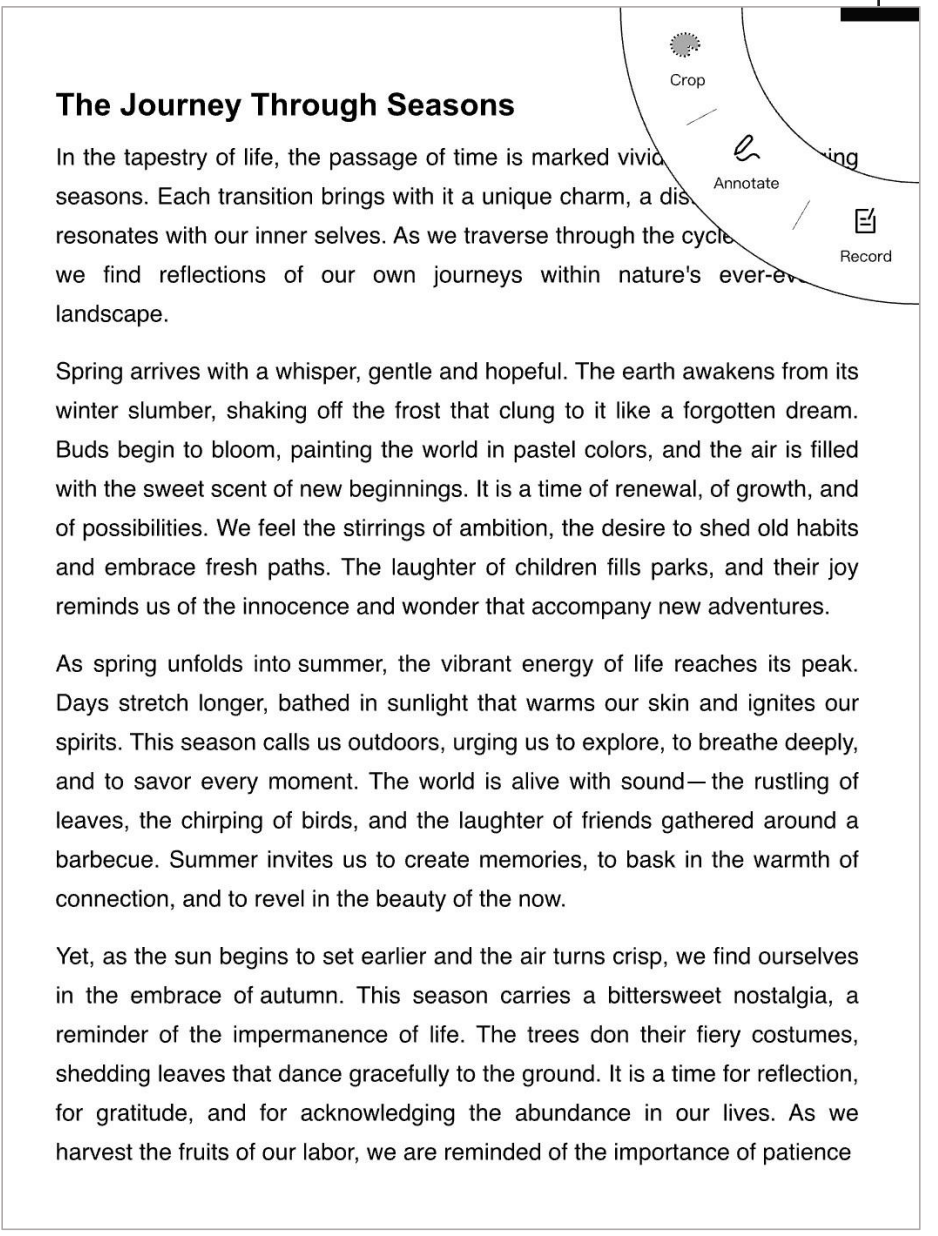

Access the Notes home page from the APK

Picking Invocation Method

Swipe from the upper right corner to the lower left edge or through the black area. This tool is global and can be invoked in any other APK.

Crop

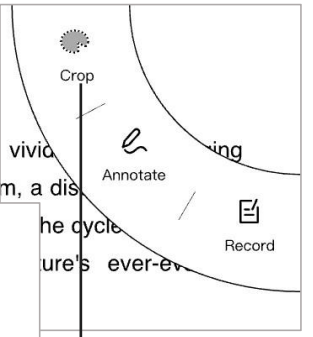

Click this icon to expand the screenshot area to full screen.

Insert the captured image into the note

Save to note screenshots

Font recognition

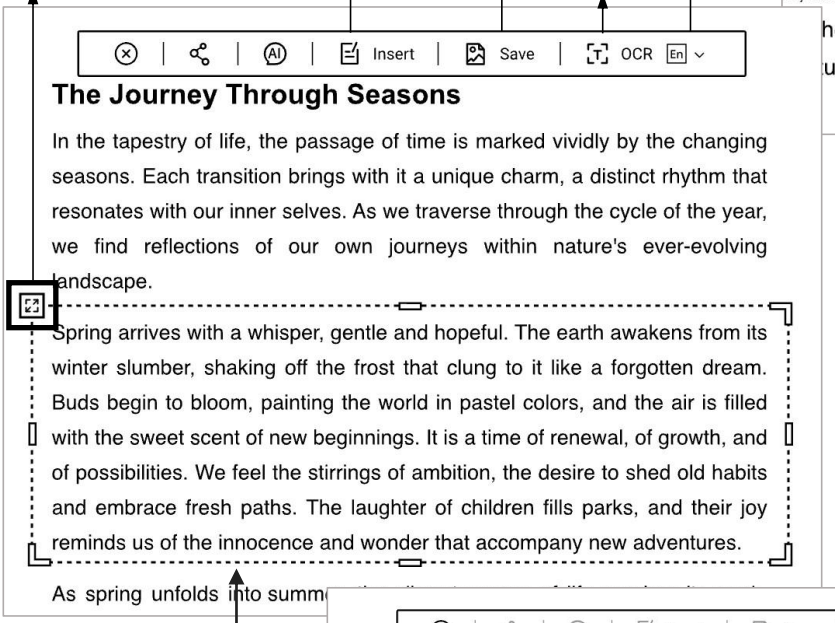

Select the language for recognition

Select Crop, then use the pen to circle the content to be captured.

The editing box can be dragged.

After selection, convert to crop and activate the editing function.

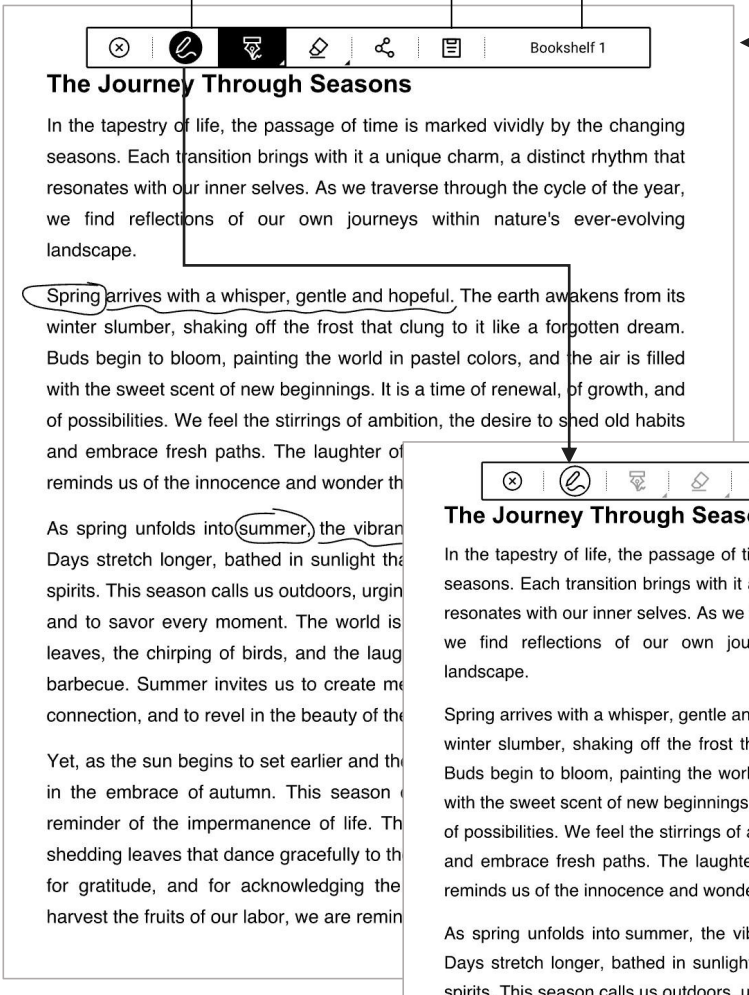

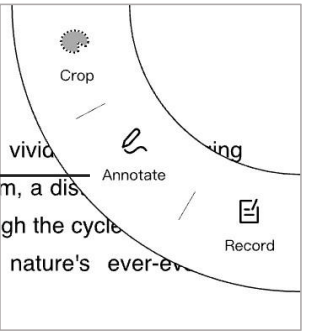

Annotate

This button activates or deactivates the annotation mode. When activated, the page is locked and annotations can be freely made.

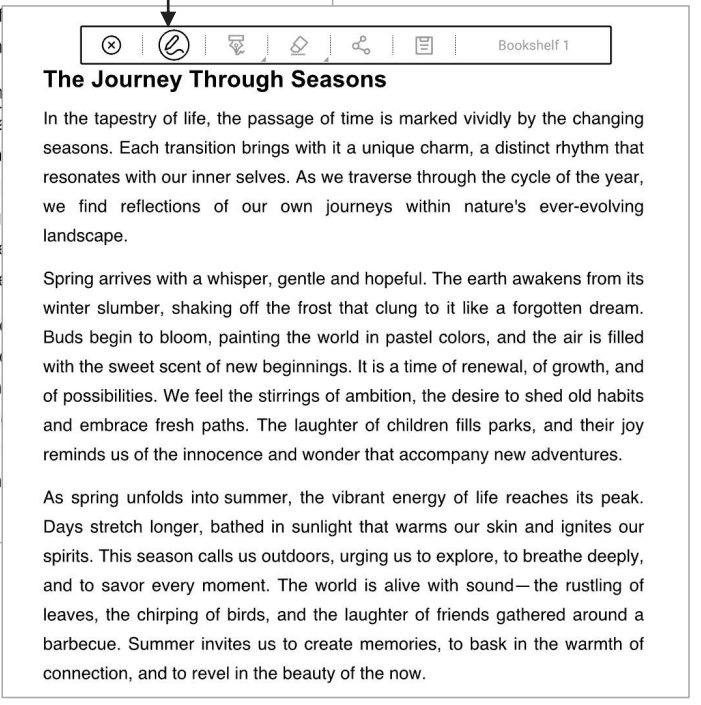

Save annotated page

Click to modify the name of the annotation

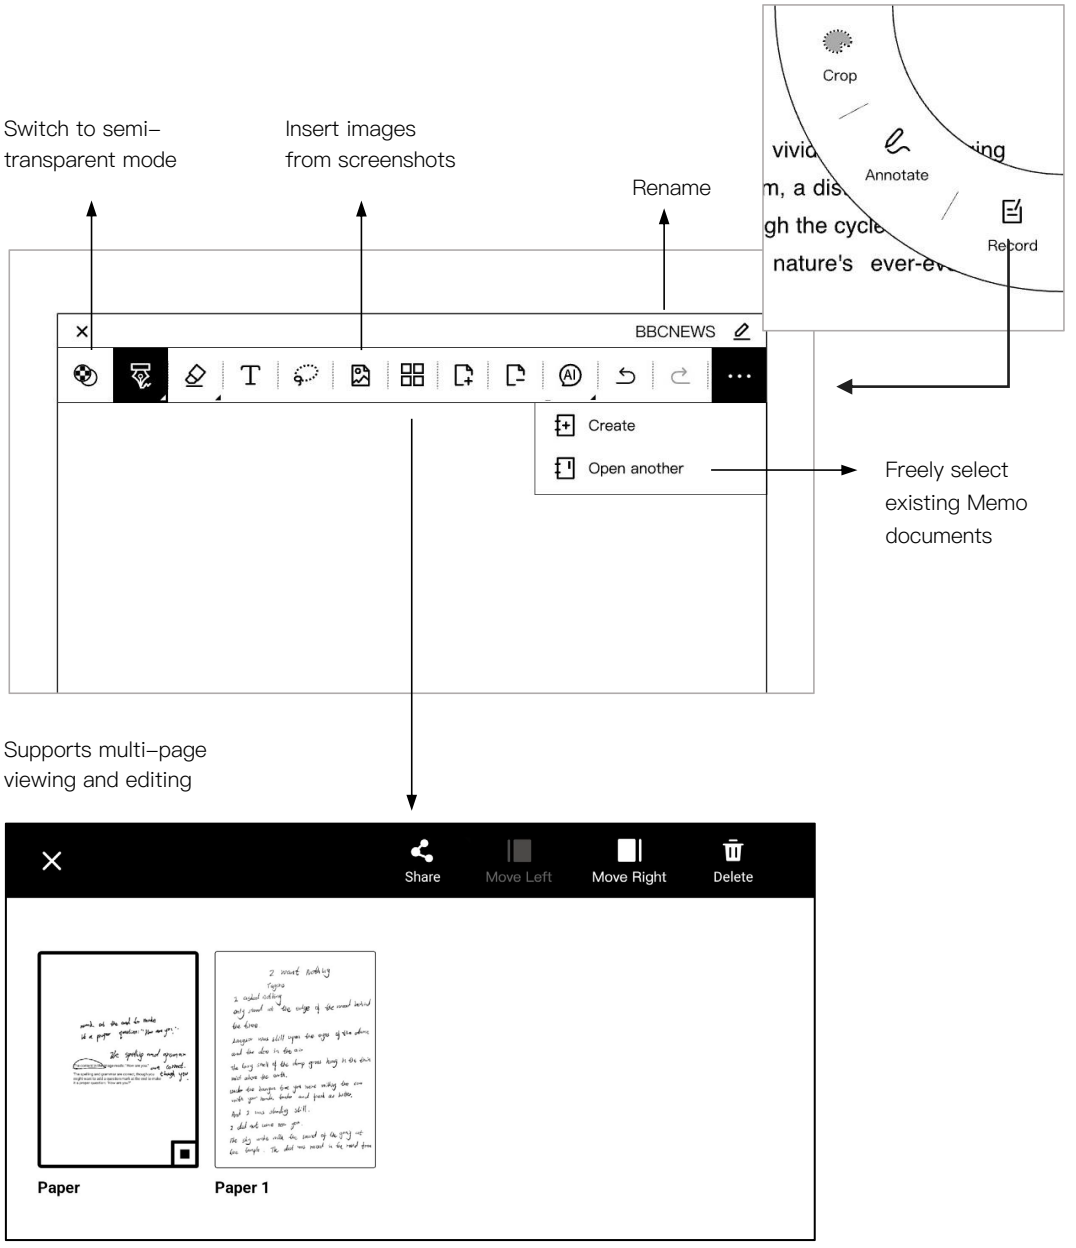

To cancel annotation mode, click the deactivation button. The annotation feature will be frozen and can be reactivated as needed.

Select Files to Encrypt or Decrypt

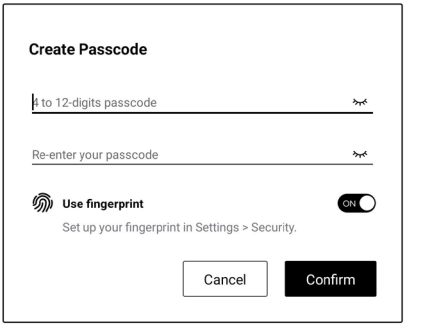

File encryption is available in both the Paper and Meeting modules. Long press a file to enter edit mode and apply encryption to one or multiple files. You may also click the encryption icon within the file toolbar to secure the current file. To remove encryption, click the icon again and enter the password. For user privacy, encryption is not linked to any account.

Set Encryption Password

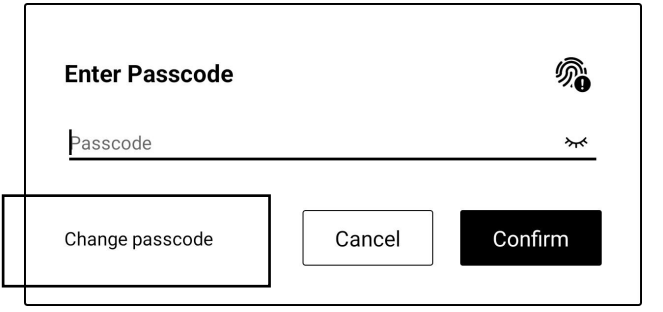

When using the document encryption feature for the first time, you must set an encryption password. Passwords for Paper and Meeting are managed independently, although identical passwords may be set. Passwords must be 4–12 characters in length. Fingerprint access for encrypted files is also supported and can be enabled manually under [Settings] — [Security] — [Fingerprint].

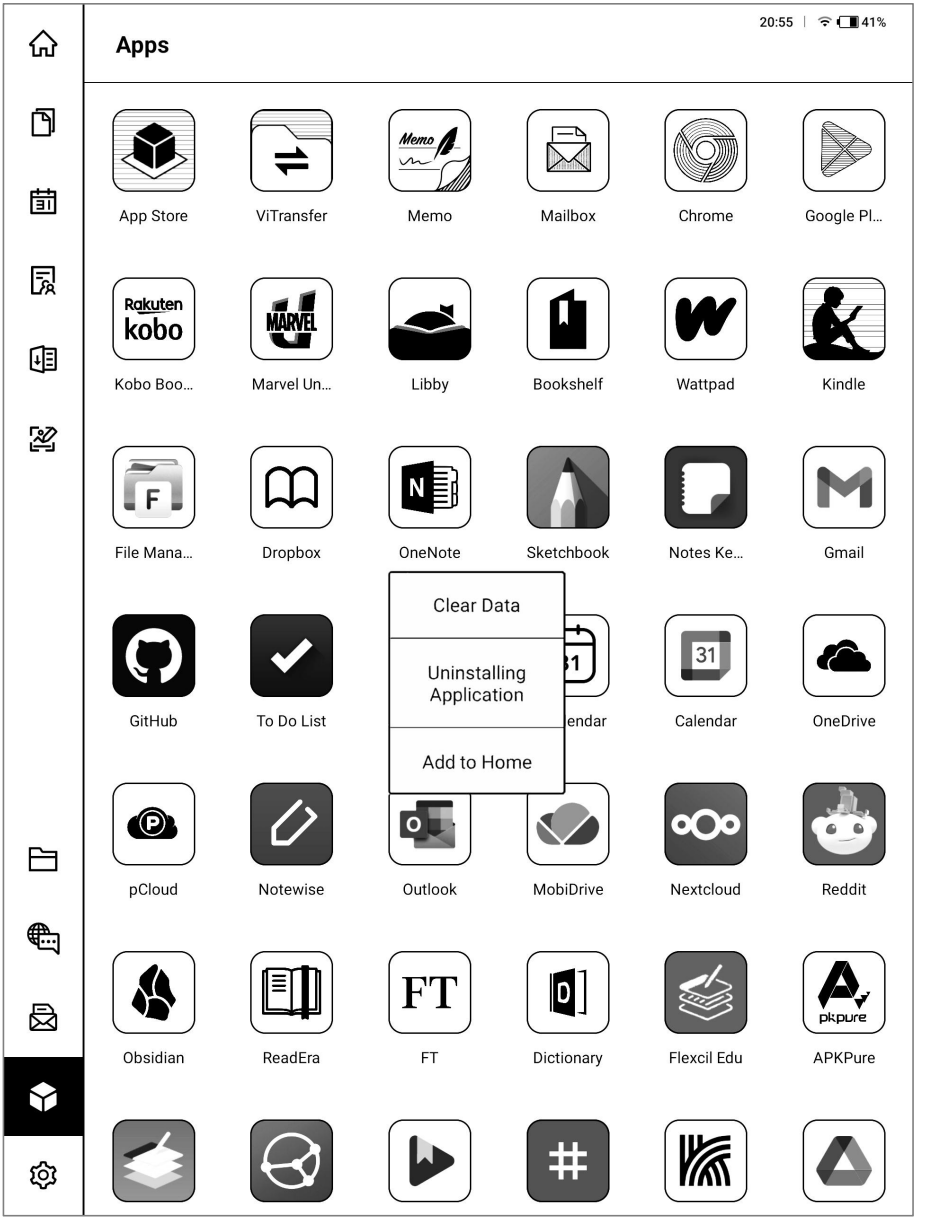

Change Encryption Password

To change the encryption password, tap the encrypted file and select the password change option on the input screen.

Note: Passwords are stored locally on the device. Please remember your password, as files cannot be unlocked if it is forgotten.

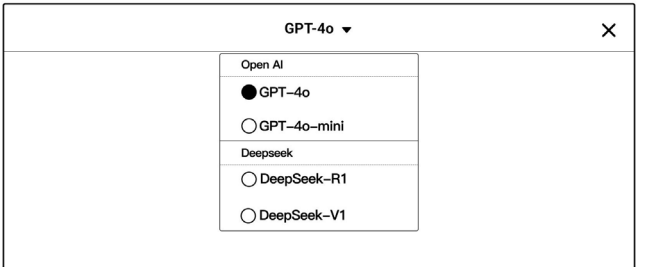

Within the Apps module, you may freely download and install third-party applications. Long pressing an app icon allows you to clear its cache, uninstall the app, or add it to the home screen.

This is an intelligent sheet of paper. It allows interaction with AI and provides context-specific AI assistance in various modules. AI functions are available even when not logged in. Supported models include GPT-4o, GPT-4o-mini, Deepseek-R1, and Deepseek-V1.

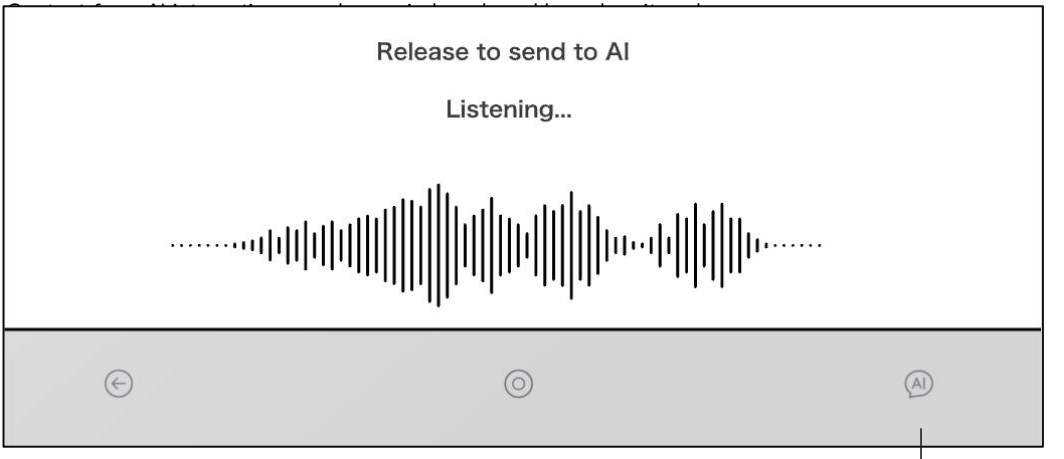

Voice AI, Text Entry via Electronic Keyboard

Long press the AI button on the bottom right corner of the e-ink tablet to record a voice message up to 15 seconds. Release to automatically send it to AI, which will transcribe the voice message into text. The AI has strong reasoning abilities to address everyday issues encountered in life and learning. AI endows our future paper with limitless intelligence.

Short press the AI button on the bottom right corner of the e-ink tablet to enter text for AI dialogue via the electronic keyboard.

Short press to use AI
Long press to input voice to AI

AI Commands

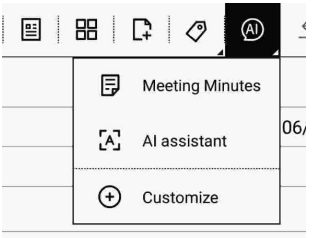

AI for Paper

In Paper, AI can analyze handwritten content, generate articles, and convert text. Custom AI commands can be set to consult the AI assistant for queries.

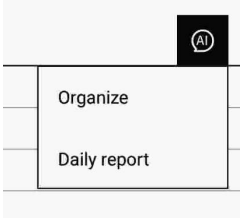

AI for Meeting

AI generates meeting minutes from recorded meeting content.

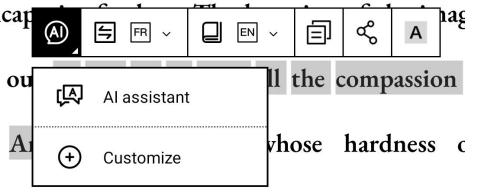

AI for Daily

In journal notes, AI can create stories, use AI assistants, organize and classify tasks, and generate schedule reports.

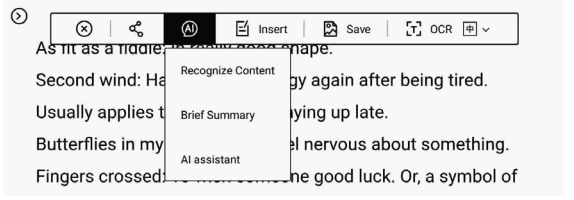

AI for learning

AI features within the reading interface support translation, dictionary, AI assistant, and customization for selected text. Full-page AI supports only the AI assistant and customization.

AI for Picking

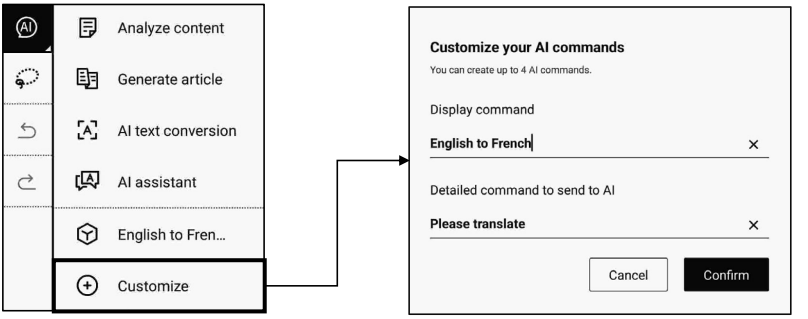

For captured images and text, AI can assist with content recognition, analysis, and summary extraction.
AI can convert full-page content into text or answer queries.

Custom AI commands

Set up AI commands according to needs. For example, if translating written text into French, name the command "Eng–Fra" and instruct the AI to "Translate the written English into French."

Up to five AI commands can be set. Long press to delete.

AI Assistant

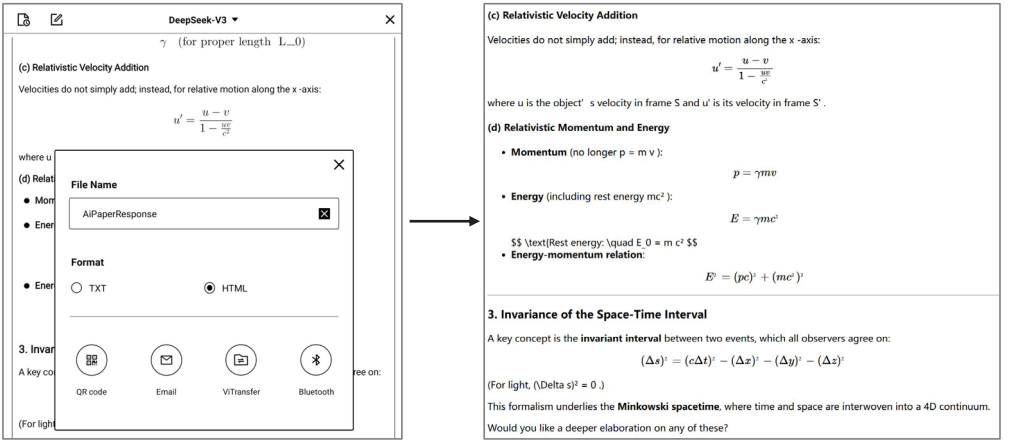

Use the AI Assistant to automatically paste selected text, circled images, or the current page into the AI dialogue box for discussion.

History

All AI dialogue records are automatically saved locally and available for continuous conversation within 24 hours. Currently, AI commands are not automatically saved.

Export

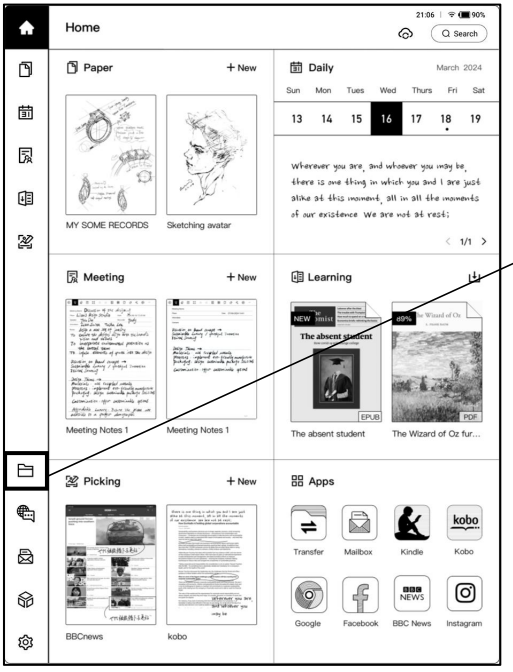

AI–generated content can be exported in TXT or HTML formats. Exporting as HTML preserves display integrity and sharing quality of AI–generated results.

Tap the Viwoods Files APK shortcut from the main sidebar.

Access My Files, Cloud Drive, and Local files.

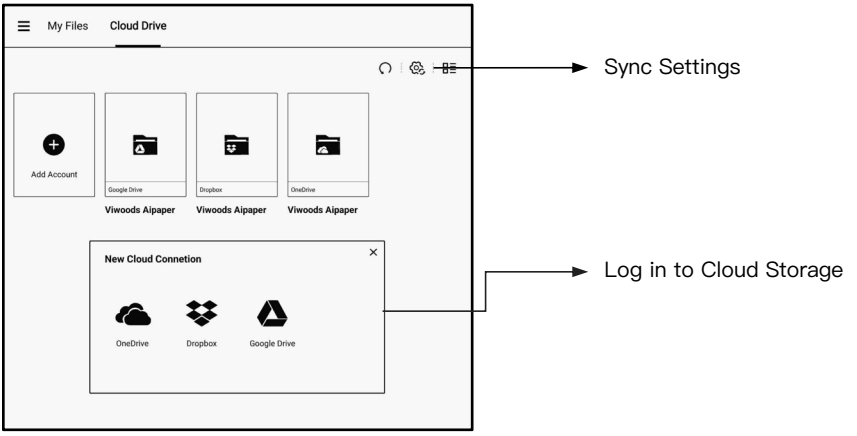

- My Files: Includes handwritten documents from the Paper, Daily, Meeting, Learning, Picking, and Memo modules.
- Cloud Drive: Files from third-party cloud storage.
- Local: Files stored locally on the device (currently in development).

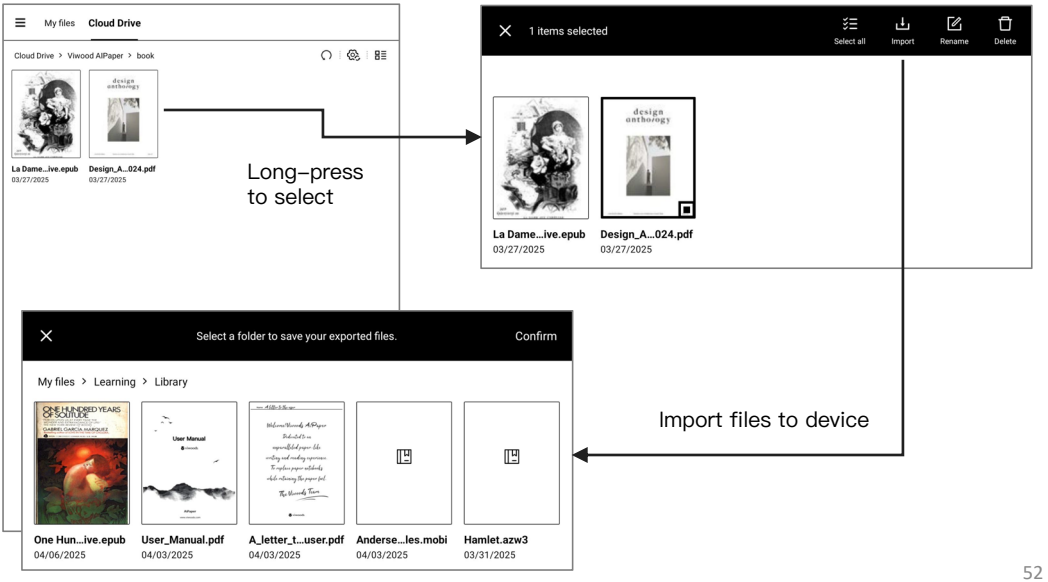

Log in to Third-Party Cloud Storage

- Click the Viwoods Files APK shortcut entry in the homepage sidebar to access the cloud storage section. It supports logging into third-party cloud storage accounts, allowing simultaneous login to Google Drive, OneDrive, and Dropbox accounts.
- By default, the first account logged in is set as the synchronization account. You can modify the synchronization account in the sync settings.

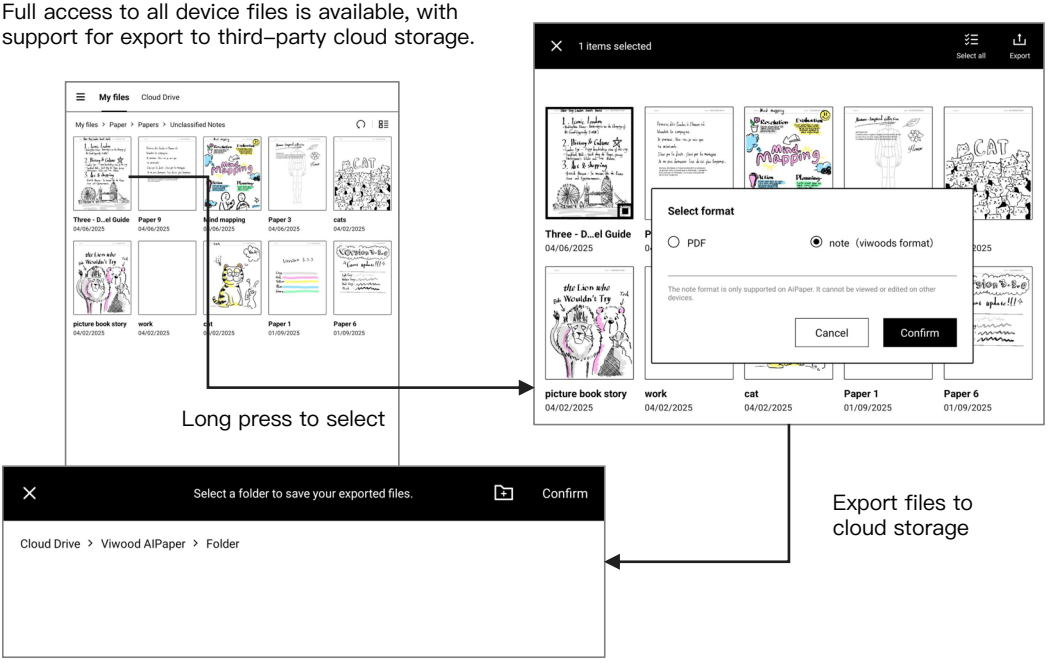

Import Cloud Files to Device

Supports browsing third-party cloud storage directories, importing files to the device, deleting files, and creating folders (folder creation is available only when importing files to cloud storage).

Device Files and Cloud Export

Full access to all device files is available, with support for export to third-party cloud storage.

1. The note format is only supported for opening and editing on AiPaper devices; it cannot be viewed on other devices.
2. Note formats are incompatible across applications. Please import note files exported from the corresponding application.

Third-Party Cloud Sync Shortcut

From the homepage, tap the third-party cloud sync button to instantly synchronize device files to Google Drive, OneDrive, or Dropbox.

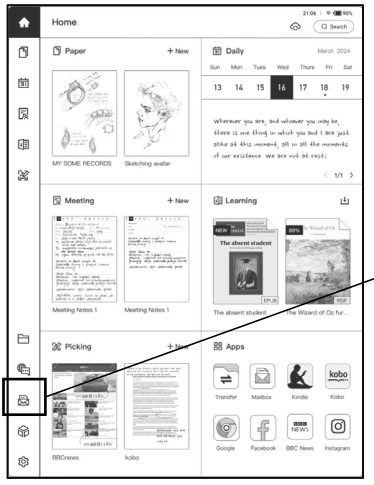

Long press the third-party cloud sync button to enter the cloud storage interface. Tap “Settings” to select the sync account, target folder, and file format for synchronization.

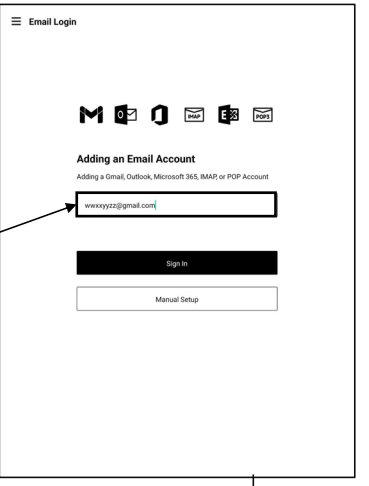

Google Account (Supports login with Google Workspace accounts)

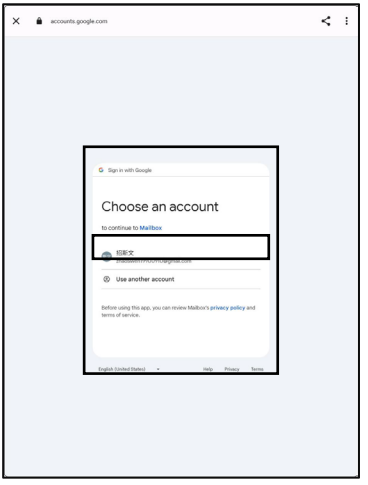

1. Tap the mailbox shortcut.

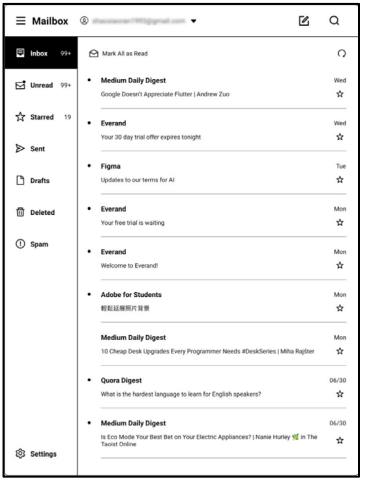

2. Enter your Google account.

3. Enter password and log in.

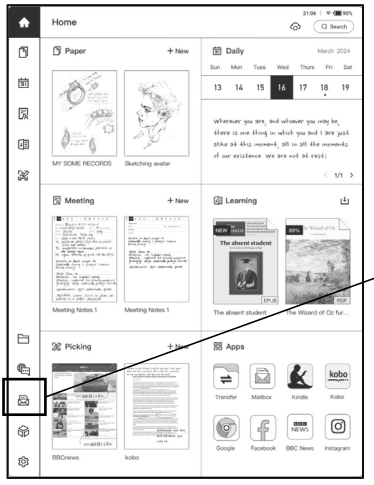

4. Login successful.

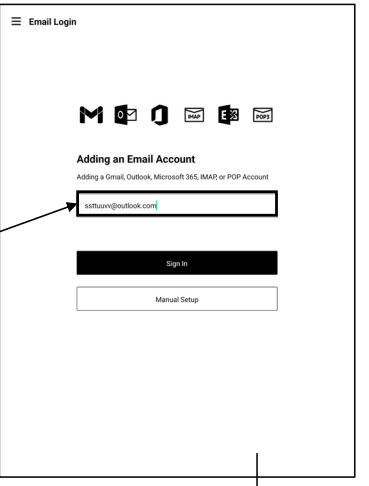

Supports Google and Outlook account logins.

Outlook Account (Supports login with Microsoft 365 accounts)

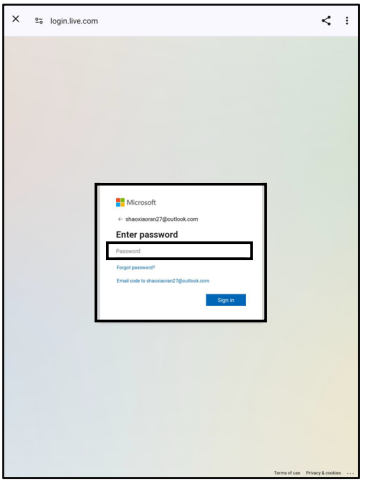

1. Tap the mailbox shortcut.

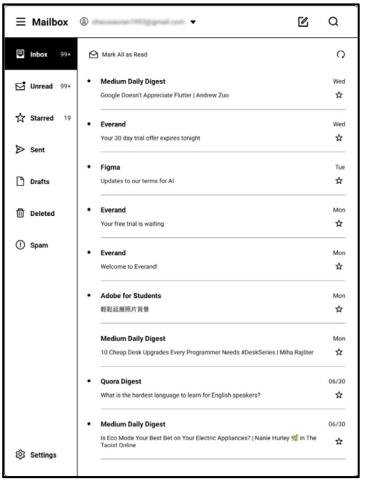

2. Enter Outlook account.

3. Enter password and log in.

4. Login successful.

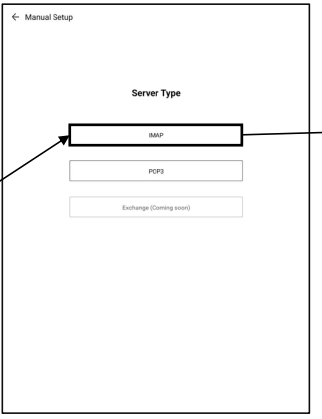

Outlook accounts with @live.com and @msn.com domains are supported

Manual Configuration of Email Via IMAP and POP3 Protocols

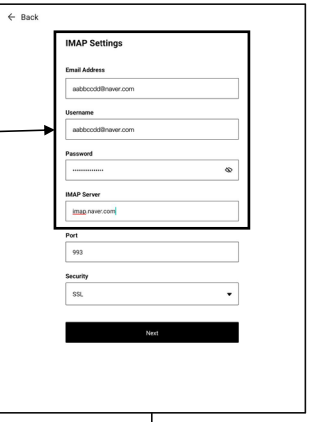

1. Tap the Manual Setup entry

2. Select IMAP or POP3 protocol

3. Enter the account information and IMAP/POP3 settings

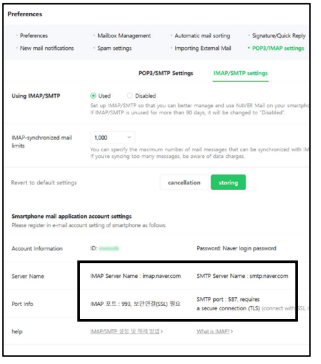

4. Enter SMTP configuration details

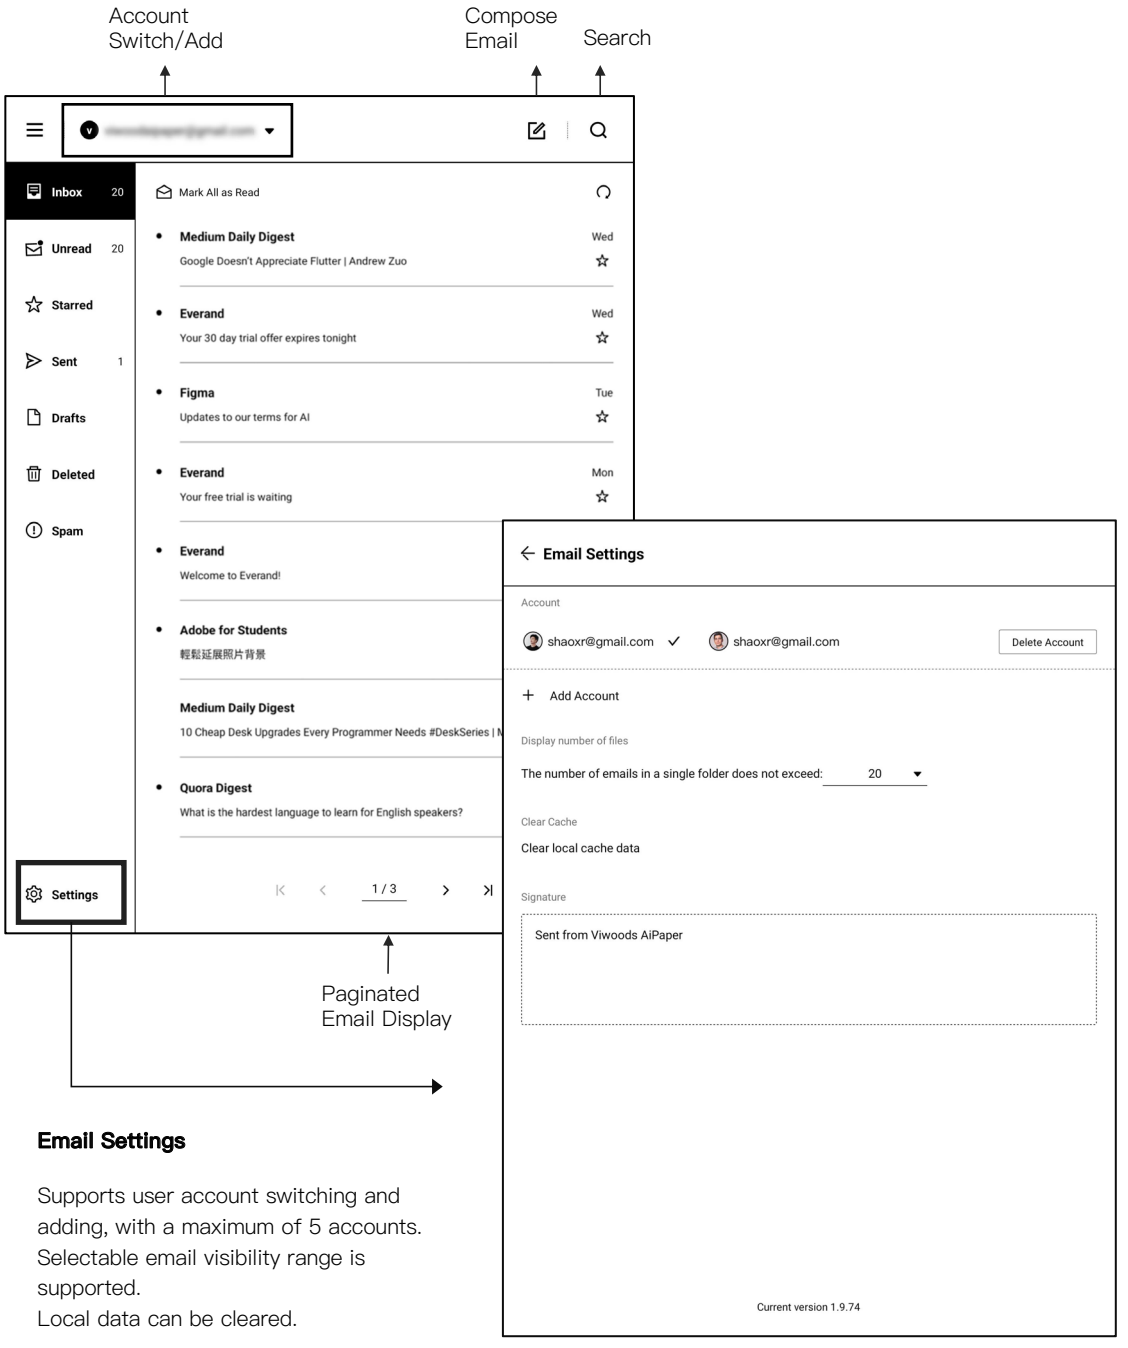

5. Login successful

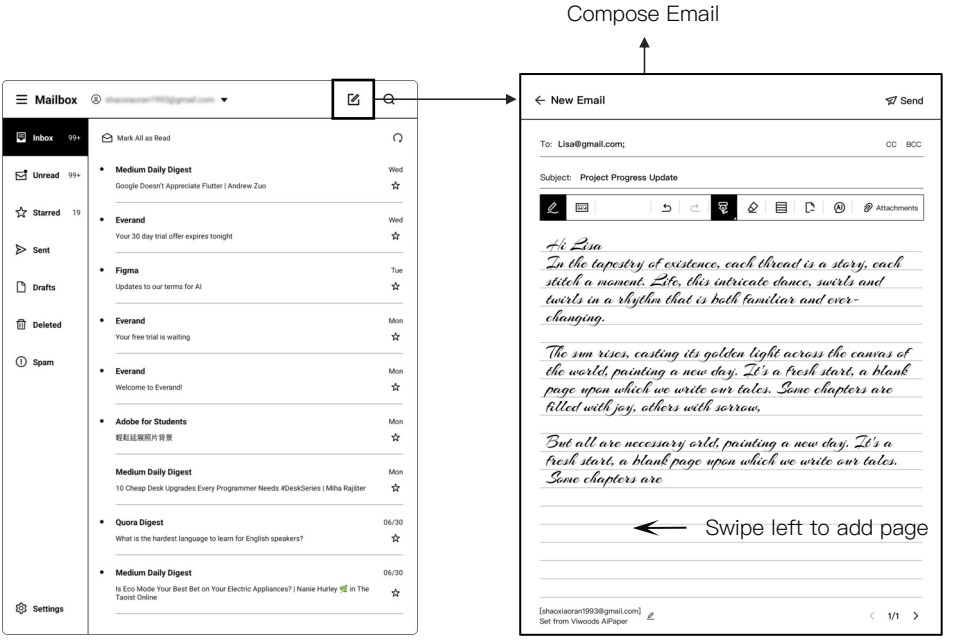

* IMAP and POP3 information can be obtained from your email provider's web interface

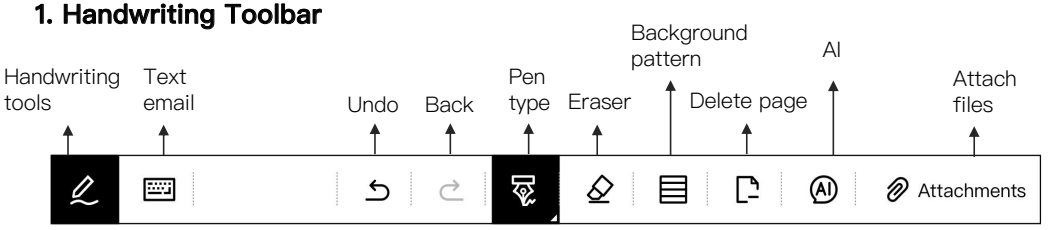

Email Settings

Supports user account switching and adding, with a maximum of 5 accounts.
Selectable email visibility range is supported.
Local data can be cleared.

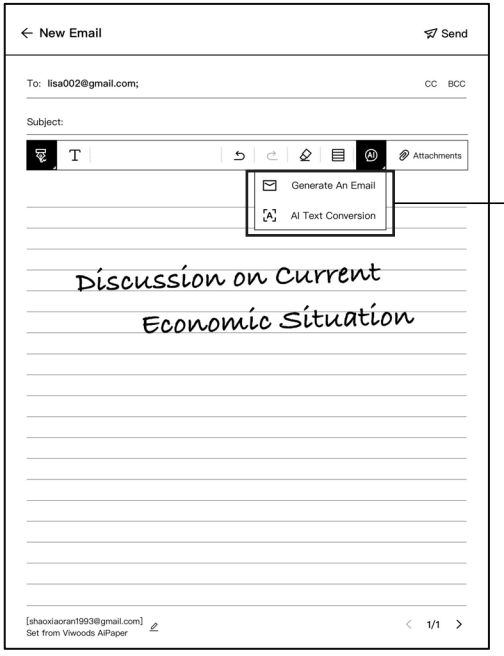

1. Handwriting Toolbar

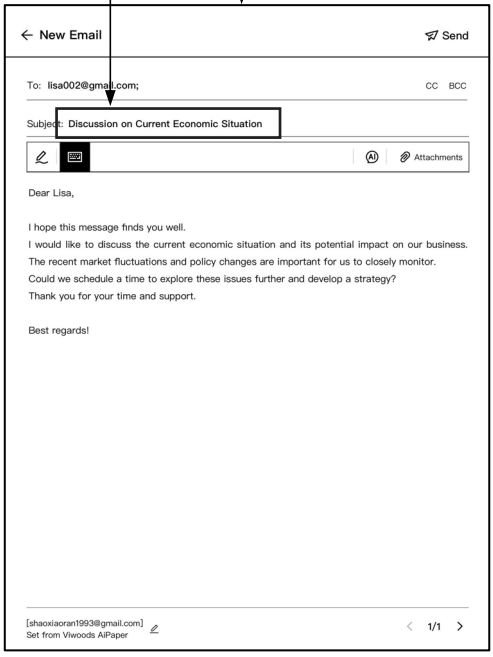

2. Text Email Toolbar

Users can choose to send an email either in handwritten form or text format.

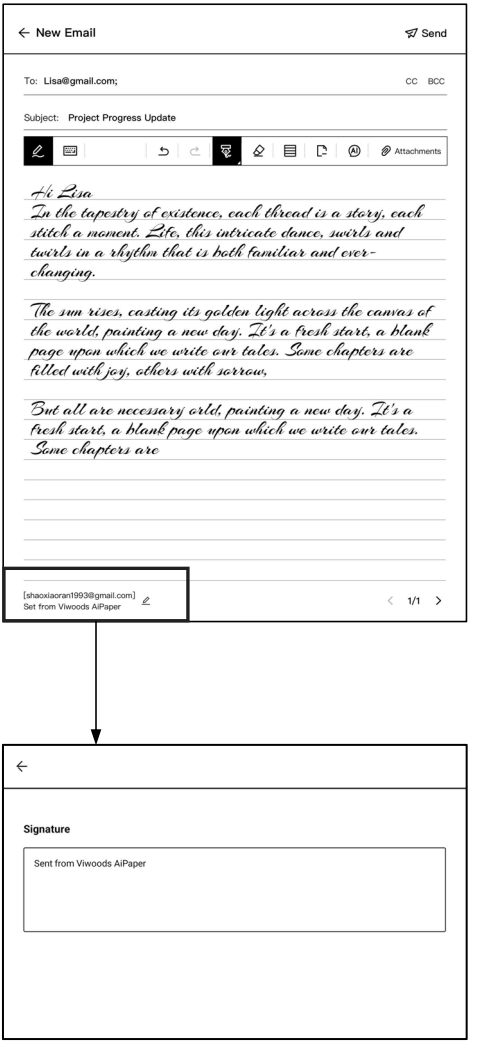

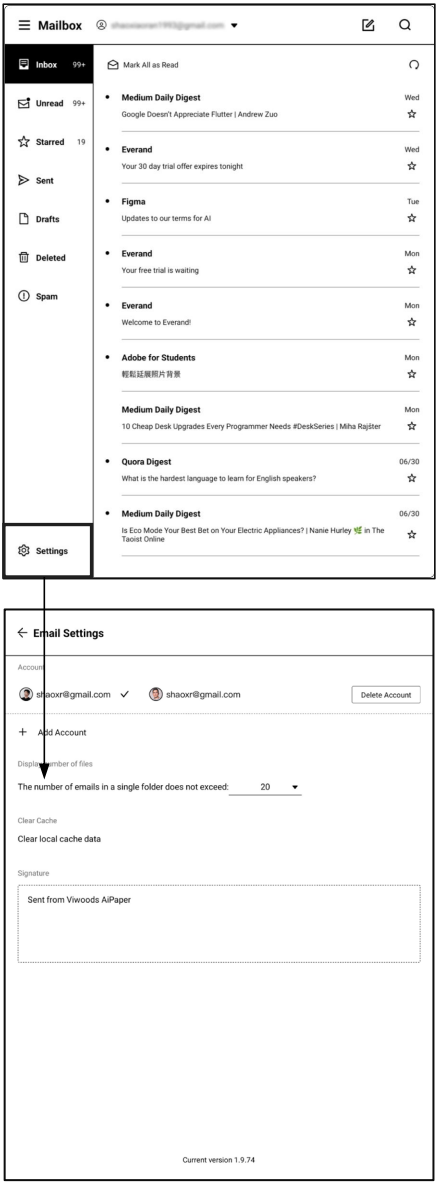

AI can automatically generate an email from handwritten content or convert handwritten text into typed text for the email.

AI automatically fills subject and name

1. Edit signature in the email compose section.

2. Edit signature in email settings.

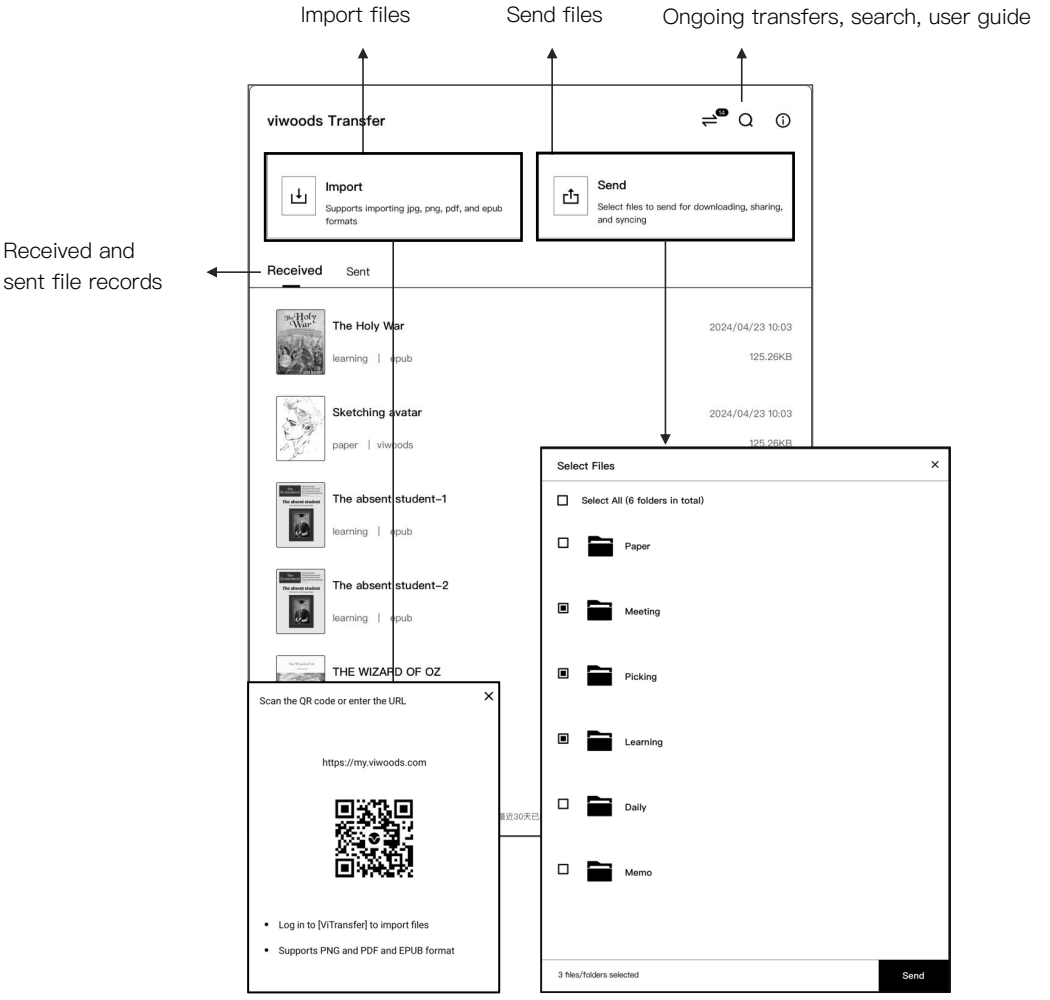

Users can customize and edit signatures either while composing an email or in the email settings.

my.viwoods.com

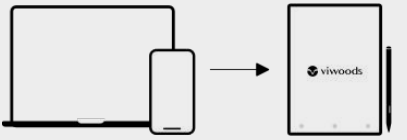

ViTransfer supports both import and export.

Log in to [ViTransfer] on a computer or mobile device to import files to the device or save files from the device to the computer/mobile device, enabling two-way file transfer.
